On January 28, 2020, Equinox Gold and Leagold securityholders voted 99.9% and 99.7% in favour, respectively, of the previously announced at-market merger. The Supreme Court of British Columbia issued its final order approving the arrangement with Leagold on January 30, 2020, the Mexican Comisión Federal de Competencia Económica issued its clearance decision on February 28, 2020, and the Company has received conditional approval from the TSX and NYSE-A stock exchanges. The merger will significantly expand Equinox Gold's asset portfolio. At completion, Equinox Gold will have six operating mines: Los Filos in Mexico, Mesquite in California, and Aurizona, Fazenda, RDM and Pilar in Brazil. The merger also enhanced Equinox Gold's growth profile, with two development projects: Castle Mountain Phase 1 in California and the Los Filos expansion in Mexico, and two growth projects: Castle Mountain Phase 2 and Santa Luz in Brazil. In addition, Equinox Gold intends to undertake exploration programs across the combined operations and is finalizing a preliminary economic assessment for the potential to develop an underground mine at Aurizona. CAUTIONARY NOTES & FORWARD-LOOKING STATEMENTS

Non-IFRS measures

This news release refers to cash costs, cash costs per ounce sold, all-in sustaining costs ("AISC"), AISC per ounce sold, adjusted EBITDA and sustaining and non-sustaining capital expenditures that are measures with no standardized meaning under International Financial Reporting Standards ("IFRS"), i.e. they are non-IFRS measures, and may not be comparable to similar measures presented by other companies. Their measurement and presentation is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS.

AISC per ounce sold

AISC per gold oz sold is a non-IFRS measure based on guidance announced by the World Gold Council ("WGC") in September 2013 and updated in November 2018. The WGC is a non-profit association of the world's leading gold mining companies established in 1987 to promote the use of gold to industry, consumers and investors. The WGC is not a regulatory body and does not have the authority to develop accounting standards or disclosure requirements. The WGC has worked with its member companies to develop a measure that expands on IFRS measures such as operating expenses and non-IFRS measures to provide visibility into the economics of a gold mining Company. Current IFRS measures used in the gold industry, such as operating expenses, do not capture all of the expenditures incurred to discover, develop and sustain gold production. The Company believes the AISC measure provides further transparency into costs associated with producing gold and will assist analysts, investors and other stakeholders of the Company in assessing its operating performance, its ability to generate free cash flow from current operations and its overall value. Combined AISC does not include corporate G&A.
