# Creating the Premier Americas Gold Producer

CORPORATE PRESENTATION  
May 2023

# Equinox Gold: Creating the Premier Americas Gold Producer

In its first five years Equinox Gold has grown from a single-asset developer to a diversified gold producer with the assets in place to produce more than 1 Moz of gold annually<sup>1</sup>

1. Equinox Gold was created with the strategic vision of building an Americas-focused gold company that will responsibly and safely produce more than one million ounces of gold annually. To achieve its growth objectives, Equinox Gold intends to expand production from its current asset base through exploration and development and will also consider opportunities to acquire other companies, producing mines and development projects that fit the Company's portfolio and strategy. 2. Mid-point of Equinox Gold's 2023 production guidance.

1. M&I Resources are exclusive of Reserves. 2. Mid-point of Equinox Gold's 2023 guidance of 555,000-625,000 oz of gold. 3. Cash on hand at March 31, 2023 + \$127 M undrawn revolving credit facility at March 31, 2023. 4. Approximate market value at April 30, 2023 of the Company's investments in i-80 Gold, Bear Creek Mining, Inca One, Pilar Gold and Sandbox Royalties. See *Cautionary Notes*. 5. Equinox Gold was created with the strategic vision of building an Americas-focused gold company that will responsibly and safely produce more than one million ounces of gold annually. To achieve its growth objectives, Equinox Gold intends to expand production from its current asset base through exploration and development and will also consider opportunities to acquire other companies and projects that fit the Company's portfolio and strategy.

# Operating Mines: USA and Mexico

## Mesquite Mine, California, USA

2023 guidance: 80,000-90,000 oz of gold

Stripping Brownie and Vista East pits to provide ore for remainder of 2023

Q1 2023: 16,405 oz of gold at \$1,780/oz AISC<sup>1</sup>, \$10.2M of sustaining capital spend

## Castle Mountain Mine, California, USA

2023 guidance: 25,000-30,000 oz of gold

Achieved crushing and agglomeration for 60% of ore processed

Q1 2023: 4,455 oz of gold at \$1,567/oz AISC<sup>1</sup>, \$0.3M sustaining capital spend

## Los Filos Mine, Guerrero, Mexico

2023 guidance: 160,000-180,000 oz of gold

Increased productivity and grade, copper content delaying recovery from some Guadalupe ore

Q1 2023: 39,574 oz of gold at \$1,696/oz AISC<sup>1</sup>, \$6.6M sustaining capital spend

1. AISC excludes corporate G&A. AISC/oz is a non-IFRS measure. See *Cautionary Notes*.

# Operating Mines: Brazil

## Aurizona Mine, Maranhão

2023 guidance: 120,000-130,000 oz  
Improved access to higher-grade ore in open pit during rainy season, higher stockpile grades  
Q1 2023: 25,800 oz at \$1,634/oz AISC<sup>1</sup>, \$10.9M sustaining capital spend

## Fazenda Mine, Bahia

2023 guidance: 60,000-65,000 oz  
Achieved higher grades from underground mine, drilled 11,000 m for Mineral Reserve replacement  
Q1 2023: 15,685 oz at \$1,279/oz AISC<sup>1</sup>, \$1.6M sustaining capital spend

## RDM Mine, Minas Gerais

2023 guidance: 50,000-60,000 oz  
Restarted mill January 19 after receipt of permit and begin in-situ mining supplemented by low-grade stockpiles  
Q1 2023: 6,342 oz at \$2,368/oz AISC<sup>1</sup>, \$2.8M sustaining capital spend

## Santa Luz Mine, Bahia

2023 guidance: 60,000-70,000 oz  
Stabilized ore blend: gold recovery averaged 62.6% for the quarter, increasing to over 65% in April  
Q1 2023: 14,485 oz at \$1,610/oz AISC<sup>1</sup>, \$0.1M sustaining capital spend

# Greenstone: Building one of Canada's Largest Gold Mines

Pre-leach thickener tank plate installation

Ball mill installation

HPGR interior

~360,000 oz of gold per year, 14+ year mine life

- Developed by Equinox Gold (60%) and Orion (40%)
- More than 5 Moz of gold produced over initial 14-year mine life<sup>1</sup>
- Expansion and extension potential from additional deposits
- Excellent infrastructure, adjacent to the Trans-Canada Hwy
- Strong Indigenous partnerships
- First gold pour on track for H1 2024

## Pre-construction readiness key to success

- 85% complete detailed engineering before construction start
- Deposits on long-lead items to preserve shipping schedule
- Multiple reviews of engineering, readiness and capex
- Independent Quantitative Risk Analysis of capex
- Geotech drilling and two independent reviews of TSF plans
- Geotech drilling for pit designs
- Continuity with key positions filled since early project definition
- Owner team integrated with G Mining rather than EPCM model

1. Shown on a 100% basis, with 60% attributable to Equinox Gold.

# Organic Growth: Expansion Projects

## Castle Mountain Mine, California, USA

Increase mining to stack over 45,000 t/d on heap leach pads  
Phase 2 permitting underway, application submitted in March 2022  
~218,000 oz/year average annual production, 14-year mine life<sup>1</sup>

## Aurizona Mine, Maranhão, Brazil

Mining of new underground and additional open-pit deposits concurrently  
Permits received for underground portal, feasibility study results in mid-2023  
~137,000 oz/year average annual production, 11-year mine life<sup>2</sup>

## Los Filos Mine, Guerrero, Mexico

Construction of a 10,000 t/d CIL plant to complement existing heap leach facilities  
CIL plant, compared to heap leach alone, adds 4 years to mine life and 1.1 Moz of gold  
~280,000 oz/year average annual production, peak production 360,000 oz/year<sup>3</sup>

1. March 2021 feasibility study showed \$389 M initial capital costs. Permitting underway. 2. September 2021 pre-feasibility study showed \$154 M initial capital costs. Feasibility study underway. Permits received for three portal locations.  
3. October 2022 feasibility study showed \$318 M initial capital costs for CIL plant. Timeline for construction not yet determined. See *Technical Disclosure*.

# Peer-leading Growth Profile: Organic Growth from Existing Assets

# Investing in Growth: Assets in Place for 1+ Moz Annual Production

## ~575 Koz incremental growth from existing assets<sup>1</sup>

- Enhanced scale and diversity with Greenstone
- Catalyst rich investment plans
- Year-on-year production growth to 1 Moz
- Diversification across four countries

## Revaluation potential with growth<sup>2</sup>

- Increased production, higher cash flow, lower costs
- Enhanced diversification across four countries
- Reduced execution risk as projects advance
- More funds available for shareholder returns

# ESG: Committed to Responsible and Ethical Mining

## ENVIRONMENT

- Beat 2022 environmental incident target by 61%
- Improved environmental performance 7% in 2022 compared to 2021
- New solar and wind power contracts in Brazil will reduce GHG emissions by 4% and result in ~\$70M savings over the 10-year contract terms
- 2022 Climate Action Report
- 2022 ESG Report

## SOCIAL

- Beat 2022 health and safety target by 36%
- Improved health and safety performance 30% in 2022 compared to 2021
- Supported community health, education, cultural and sports programs
- Funded skills training and infrastructure improvement
- Diversity and inclusion training at mine sites

## GOVERNANCE

- Expanded ESG disclosure and performance metrics
- Updated and expanded governance policies with workforce-wide training
- Continued implementing leading industry standards including UN Global Compact, Towards Sustainable Mining and Responsible Gold Mining Principles

**Target to achieve 25% reduction in GHG emissions by 2030**

## ANALYST COVERAGE

Canaccord Genuity, CIBC World Markets, Cormark Securities, Desjardins Securities, Haywood Securities, National Bank Financial, Scotiabank, RBC Capital Markets, TD Securities

1. Basic basis at May 2, 2023, as announced in the Company's Q1 2023 MD&A.
2. Weighted average warrant and option exercise prices are shown at the price that would be paid to Equinox Gold to receive one full EQX share. Warrant and option numbers are shown as the number of common shares that would be issued upon exercise of the securities.
3. Restricted Share Units are shares committed to management and directors that are issued subject to time-based and performance-based vesting terms, as part of equity-based compensation.
4. Fully diluted shares outstanding includes the Mubadala, Verition and Pacific Road convertible notes. See footnote 8.
5. Average daily trading value since January 2022.
6. Cash on hand at March 31, 2023, as announced in the Company's Q1 2023 financials.
7. Net debt comprises amount drawn on the revolving credit facility net of transaction costs, plus equity settled notes, minus cash. See footnote 8.
8. Face value of the convertible notes held by Mubadala Investment Company, Verition Advisors (Canada) ULC and Pacific Road Resources Fund. Mubadala and Verition hold notes of \$130 M and \$9.7 M, respectively, convertible at a fixed US\$ price of \$5.25 per share at the holders' option. Mubadala and Pacific Road hold notes of \$130 M and \$9.3 M, respectively, convertible at a fixed US\$ price of \$7.80 per share at the holders' option. If all four notes were fully converted, the Company would issue 44.5 M shares.
9. Calculated using the May 1, 2023 share price for EQX.

# Highly Leveraged to Gold: EQX Outperforms With Rising Gold Prices

## Highest leverage to gold

Equinox Gold's operating margins increase ~33% with a 5% increase in gold price <sup>1</sup>

## Gold equities undervalued

Gold equities remain highly undervalued compared to historical gold : equity ratios

### Market Performance Jan-Apr 2023

### Gold Equities Highly Undervalued

1. Using \$1,900/oz gold as the baseline and assuming Equinox Gold achieves the mid-point of its cost guidance with ~\$1,600/oz AISC.

The Hasaga technical report is available on SEDAR under Premier Gold’s profile.

Readers are reminded that results outlined in the technical reports for some of these projects are preliminary in nature and may include Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves.

There is no certainty that the mine plans and economic models contained in any of the reports will be realized. Readers are further cautioned that Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Readers are also advised to refer to the latest annual information form and technical reports of the Companies as well as other continuous disclosure documents filed by the Companies, which are available on SEDAR, for detailed information (including qualifications, assumptions and notes set out accordingly) regarding the Mineral Reserve and Mineral Resource information contained in this document.

## Qualified Persons

Doug Reddy, MSc, P.Geo., Equinox Gold’s COO, and Scott Heffernan, MSc, P.Geo, Equinox Gold’s EVP Exploration, are the Qualified Persons under NI 43-101 for Equinox Gold and have reviewed and approved the technical information in this presentation.

Doug Reddy and Scott Heffernan have reviewed the technical reports for the Greenstone and the Hasaga Property for Equinox Gold. To the best of Equinox Gold’s knowledge, information and belief, there is no new material scientific or technical information that would make the disclosure of the mineral resource and mineral reserves or other technical information for the Greenstone Project or the Hasaga Property inaccurate or misleading.

# Cautionary Notes

**Forward-looking Statements.** This presentation contains certain forward-looking information and forward-looking statements within the meaning of applicable securities legislation and may include future-oriented financial information. Forward-looking statements and forward-looking information in this presentation relate to, among other things: the strategic vision for the Company and expectations regarding exploration potential, production capabilities and future financial or operating performance, including investment returns; the Company's production and cost guidance; the timing for and the Company's ability to successfully advance its growth and development projects, including the construction of Greenstone and the expansions at Aurizona, Castle Mountain and Los Filos; the strength of the Company's balance sheet, and the Company's liquidity and future cash requirements; the aggregate value of common shares that may be issued pursuant to the at-the-market equity offering program; the potential future offerings of securities under the Base Shelf Prospectus or corresponding Registration Statement and any Prospectus Supplement; and the expectations for the Company's investments including in Sandbox, i-80 Gold, Bear Creek, Inca One and Pilar Gold. Forward-looking statements or information generally identified by the use of the words "will", "objective", "achieve", "intends", "envision", "potential", "on schedule", "on budget", "improve" and similar expressions and phrases or statements that certain actions, events or results "could", "would" or "should", or the negative connotation of such terms, are intended to identify forward-looking statements and information. Although the Company believes that the expectations reflected in such forward-looking statements and information are reasonable, undue reliance should not be placed on forward-looking statements since the Company can give no assurance that such expectations will prove to be correct. The Company has based these forward-looking statements and information on the Company's current expectations and projections about future events and these assumptions include: Equinox Gold's ability to achieve the production, cost and development expectations for its respective operations and projects; existing assets are retained and continue to produce at current rates; expectations regarding the impact of macroeconomic factors on the Company's operations, share price performance and gold price; prices for gold remaining as estimated; currency exchange rates remaining as estimated; availability of funds for the Company's projects and future cash requirements; prices for energy inputs, labour, materials, supplies and services remaining as estimated; construction at Greenstone being completed and performed in accordance with current expectations; the expansion projects at Aurizona, Castle Mountain and Los Filos being completed and performed in accordance with current expectations; the mine plans outlined in the technical reports for each project, including estimated development schedules, are unchanged; tonnage of ore to be mined and processed; ore grades and recoveries remaining consistent with mine plans; capital, decommissioning and reclamation estimates; Mineral Reserve and Mineral Resource estimates and the assumptions on which they are based; no labour-related disruptions and no unplanned delays or interruptions in scheduled construction, development and production, including by blockade; the Company's working history with the workers, unions and communities at Los Filos; all necessary permits, licenses and regulatory approvals are received in a timely manner; the Company's ability to comply with environmental, health and safety laws; the strategic visions for Sandbox, i-80 Gold, Bear Creek, Inca One and Pilar Gold and their respective abilities to successfully advance their businesses; and the ability of Bear Creek, Inca One and Pilar Gold to meet their payment commitments to the Company. While the Company considers these assumptions to be reasonable based on information currently available, they may prove to be incorrect. Accordingly, readers are cautioned not to put undue reliance on the forward-looking statements or information contained in this presentation. The Company cautions that forward-looking statements and information involve known and unknown risks, uncertainties and other factors that may cause actual results and developments to differ materially from those expressed or implied by such forward-looking statements and information contained in this presentation and the Company has made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: fluctuations in gold prices; fluctuations in

prices for energy inputs, labour, materials, supplies and services; fluctuations in currency markets; operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding and severe weather); inadequate insurance, or inability to obtain insurance to cover these risks and hazards; employee relations; relationships with, and claims by, local communities and Indigenous populations; the effect of blockades and community issues on the Company's production and cost estimates; the Company's ability to obtain all necessary permits, licenses and regulatory approvals in a timely manner or at all; changes in laws, regulations and government practices, including environmental, export and import laws and regulations; legal restrictions relating to mining; risks relating to expropriation; increased competition in the mining industry; a successful relationship between the Company and its joint venture partner; the failure by Bear Creek, Inca One or Pilar Gold to meet one or more of their respective payment commitments to the Company; and those factors identified in the Company's MD&A for the year ended December 31, 2022 and its most recently filed Annual Information Form, copies of which are available on SEDAR at [www.sedar.com](http://www.sedar.com) and on EDGAR at [www.sec.gov/edgar](http://www.sec.gov/edgar). Forward-looking statements and information are designed to help readers understand management's views as of that time with respect to future events and speak only as of the date they are made. Except as required by applicable law, the Company assumes no obligation to publicly announce the results of any change to any forward-looking statement or information contained or incorporated by reference to reflect actual results, future events or developments, changes in assumptions or changes in other factors affecting the forward-looking statements and information. If the Company updates any one or more forward-looking statements, no inference should be drawn that the Company will make additional updates with respect to those or other forward-looking statements. All forward-looking statements and information contained in this presentation are expressly qualified in their entirety by this cautionary statement.

**Non-IFRS Measures.** This presentation refers to all-in sustaining costs ("AISC") per ounce sold and sustaining capital which are measures with no standardized meaning under International Financial Reporting Standards ("IFRS") and may not be comparable to similar measures presented by other companies. Their measurement and presentation are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Non-IFRS measures are widely used in the mining industry as measurements of performance and the Company believes that they provide further transparency into costs associated with producing gold and will assist analysts, investors and other stakeholders of the Company in assessing its operating performance, its ability to generate free cash flow from current operations and its overall value. Refer to the "Non-IFRS measures" section of the Company's MD&A for the year ended December 31, 2022, for a more detailed discussion of these non-IFRS measures and their calculation.

**Cautionary Note to U.S. Investors Concerning Estimates of Reserves and Resources.** Disclosure regarding the Company's mineral properties, including with respect to Mineral Reserve and Mineral Resource estimates included in this presentation, was prepared in accordance with National Instrument 43-101. NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. NI 43-101 differs significantly from the disclosure requirements of the Securities and Exchange Commission (the "SEC") generally applicable to U.S. companies. Accordingly, information contained in this presentation is not comparable to similar information made public by U.S. companies reporting pursuant to SEC disclosure requirements.
