EQUINOXGOLD

Creating the Premier Americas Gold Producer

AGM & CORPORATE UPDATE May 9, 2024

Cautionary Notes

Forward-looking Statements. This presentation contains certain forward-looking information and forward-looking statements within the meaning of applicable securities legislation and may include future-oriented financial information. Forward-looking statements and forward-looking information in this presentation relate to, among other things: the strategic vision for the Company and expectations regarding exploration potential, production capabilities and future financial or operating performance, including investment returns and share price performance; the Company's production and cost guidance, including pro forma guidance; timing for and the Company's ability to successfully advance its growth and development projects, including commissioning of Greenstone and the expansion projects at Castle Mountain, Los Filos and Aurizona; the Company's ability to successfully complete the Transaction and the timing thereof; the completion and closing of the Term Loan; the company's ability to pay the deferred payment in connection with the Transaction; the timing of Greenstone achieving first gold pour and commercial production; the anticipated benefits of consolidating ownership of Greenstone; the Company's ability to successfully renegotiate existing land access agreements at Los Filos and the anticipated impact on Los Filos if those negotiations are unsuccessful; the ability of the Company to mitigate the impact of the geotechnical event in the Piaba pit on planned 2024 production from Aurizona; the timing and the ability of the Company to complete an updated assessment of the Piaba pit; the strength of the Company's balance sheet, and the Company's liquidity and future cash requirements; the Company's ability to execute on its deleveraging plans; expectations for gold price performance; the Company's expectations for achieving its responsible mining objectives, including expectations for the Company's health and safety performance; and expectations for the Company's investments including in Sandbox, i-80 Gold, and Bear Creek. Forward-looking statements or information generally identified by the use of the words "will", "expect", "achieve", "potential", "on track", "target", "grow", "increase", "improve", "enhance", "opportunity" and similar expressions and phrases or statements that certain actions, events or results "could", "would" or "should", or the negative connotation of such terms, are intended to identify forward-looking statements and information. Although the Company believes that the expectations reflected in such forward-looking statements and information are reasonable, undue reliance should not be placed on forward-looking statements since the Company can give no assurance that such expectations will prove to be correct. The Company has based these forward-looking statements and information on the Company's current expectations and projections about future events and these assumptions include: Equinox Gold's ability to achieve the production, cost and development expectations for its respective operations and projects; that existing assets are retained and continue to produce at current rates; expectations regarding the impact of macroeconomic factors on the Company's operations, share price performance, demand for gold and gold price; prices for gold remaining as estimated; currency exchange rates remaining as estimated; availability of funds for the Company's projects and future cash requirements; prices for energy inputs, labour, materials, supplies and services remaining as estimated; commissioning at Greenstone being completed and performed in accordance with current expectations; the Company's ability to identify and implement opportunities to mitigate the impact of the geotechnical event at Aurizona; the expansion projects at Aurizona, Castle Mountain and Los Filos being completed and performed in accordance with current expectations; that mine plans and estimated development schedules remain consistent with the plans outlined in the technical reports for each project; that tonnage of ore to be mined and processed, and ore grades and recoveries, remain consistent with the plans outlined in the technical reports for each project; Mineral Reserve and Mineral Resource estimates and the assumptions on which they are based; no labour-related disruptions and no unplanned delays or interruptions in scheduled construction, development and production, including by blockade; the Company's working history with the workers, unions and communities at Los Filos; that all necessary permits, licenses and regulatory approvals are received in a timely manner; the Company's ability to comply with environmental, health and safety laws; the strategic visions for Sandbox, i-80 Gold and Bear Creek and their respective abilities to successfully advance their businesses; and the ability of Bear Creek to meet its payment commitments to the Company; and the ability of Equinox Gold to work productively with its Indigenous partners at Greenstone. While the Company considers these assumptions to be reasonable based on information currently available, they may prove to be incorrect. Accordingly, readers are cautioned not to put undue reliance on the forward-looking statements or information contained in this presentation. The Company cautions that forward-looking statements and information involve known and unknown risks, uncertainties and other factors that may cause actual results and developments to differ materially from those expressed or implied by such forward-looking statements and

information contained in this presentation and the Company has made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: fluctuations in gold prices; fluctuations in prices for energy inputs, labour, materials, supplies and services; fluctuations in currency markets; operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, , geotechnical failures, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding and severe weather); inadequate insurance, or inability to obtain insurance to cover these risks and hazards; employee relations; relationships with, and claims by, local communities and Indigenous populations; the effect of blockades and community issues on the Company's production and cost estimates; the Company's ability to obtain all necessary permits, licenses and regulatory approvals in a timely manner or at all; changes in laws, regulations and government practices, including environmental, export and import laws and regulations; legal restrictions relating to mining; risks relating to expropriation; increased competition in the mining industry; the failure by Bear Creek to meet its payment commitment to the Company; and those factors identified in the Company's MD&A for the year ended December 31, 2023 and its most recently filed Annual Information Form, copies of which are available on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov/edgar. Forward-looking statements and information are designed to help readers understand management's views as of that time with respect to future events and speak only as of the date they are made. Except as required by applicable law, the Company assumes no obligation to publicly announce the results of any change to any forward-looking statement or information contained or incorporated by reference to reflect actual results, future events or developments, changes in assumptions or changes in other factors affecting the forward-looking statements and information. If the Company updates any one or more forward-looking statements, no inference should be drawn that the Company will make additional updates with respect to those or other forward-looking statements. All forward-looking statements and information contained in this presentation are expressly qualified in their entirety by this cautionary statement.

Non-IFRS Measures. This presentation refers to all-in sustaining costs ("AISC") per ounce sold and sustaining capital which are measures with no standardized meaning under International Financial Reporting Standards ("IFRS") and may not be comparable to similar measures presented by other companies. Their measurement and presentation are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Non-IFRS measures are widely used in the mining industry as measurements of performance and the Company believes that they provide further transparency into costs associated with producing gold and will assist analysts, investors and other stakeholders of the Company in assessing its operating performance, its ability to generate free cash flow from current operations and its overall value. Refer to the "Non-IFRS measures" section of the Company's MD&A for the year ended December 31, 2022, for a more detailed discussion of these non-IFRS measures and their calculation.

Cautionary Note to U.S. Investors Concerning Estimates of Reserves and Resources. Disclosure regarding the Company's mineral properties, including with respect to Mineral Reserve and Mineral Resource estimates included in this presentation, was prepared in accordance with National Instrument 43-101. NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. NI 43-101 differs significantly from the disclosure requirements of the Securities and Exchange Commission (the "SEC") generally applicable to U.S. companies. Accordingly, information contained in this presentation is not comparable to similar information made public by U.S. companies reporting pursuant to SEC disclosure requirements.

Numbers may not sum due to rounding. All dollar amounts in USD unless otherwise noted.

Creating the Premier Americas Gold Producer

In its first six years, Equinox Gold has grown from a single-asset developer to a diversified gold producer. We acquired one mine and two companies, built three mines, sold two mines, created three new companies and are commissioning one of Canada's largest new gold mines.

^{1.} Mid-point of Equinox Gold's 2024 guidance pro forma the Greenstone consolidation. The Company may revise guidance during the year to reflect changes to expected results. 2. Commissioning is underway with first gold pour on track for May 2024.

ANNUAL GOLD PRODUCTION³

^{1.} Pro forma consolidation of the Greenstone gold project as per pending transaction announced on April 23, 2024. 2. M&I Resources are exclusive of Reserves. See *Appendix* slides. 3. Equinox Gold was created with the strategic vision of building an Americas-focused gold company that will responsibly and safely produce more than one million ounces of gold annually. To achieve its growth objectives, Equinox Gold intends to expand production from its current asset base through exploration and development and will also consider opportunities to acquire other companies and projects that fit the Company's portfolio and strategy.

Delivering on Promises

2023 TARGETS	ACCOMPLISHMENTS
Construct Greenstone on time and on budget	Greenstone commissioning underway and on schedule for first gold pour in May 2024 Construction effectively complete, on budget, at year-end 2023
Achieve guidance	Achieved production guidance with 564,458 oz of gold produced Beat cash costs guidance, achieved all-in sustaining costs guidance
Replace reserves, grow resources	Replaced reserves through strategic exploration and mine planning Identified new mineralization for mine life extension and regional growth
Advance expansion projects	Aurizona: Advanced technical studies, received permits for underground development Castle Mountain: Advanced Phase 2 permitting and front-end engineering design Los Filos: Implemented operational improvements, advanced community dialogue

Shareholder Performance in 2023

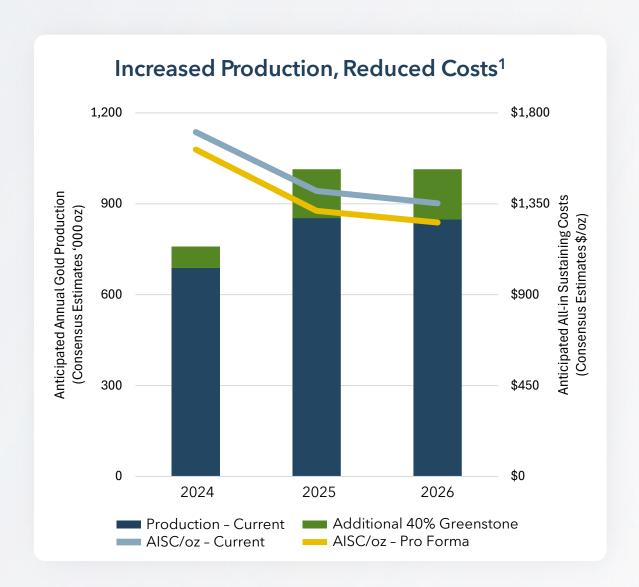

Consolidating Greenstone Brings Significant Benefits

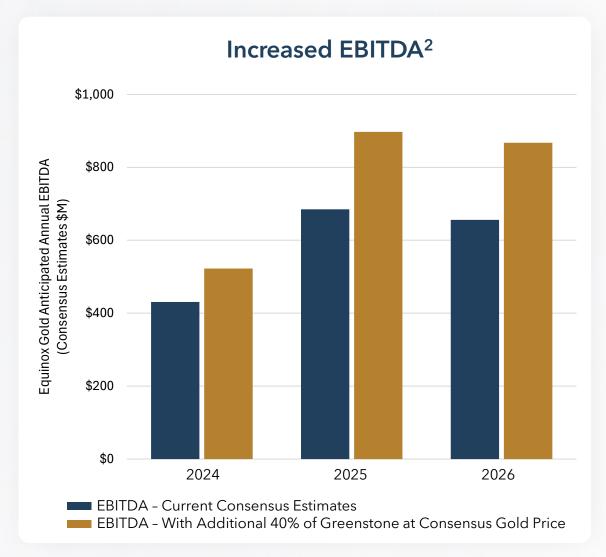

Acquiring the additional 40% interest in Greenstone gives EQX

- Increased gold production Additional 160,000 oz of gold per year for first five years (144,000 per year LOM)¹
- Improved cost structure Greenstone will contribute ~40% of EQX annual production at AISC less than \$975/oz²
- Increased cash flow More than \$200 M in additional EBITDA per year to Equinox Gold when operating at capacity³
- Enhanced diversification Rare opportunity to own 100% of a tier-one mine in a top mining jurisdiction
- Increased gold endowment Adds 2.2 Moz of Mineral Reserves, 0.6 Moz of M&I Resources and 1.2 Moz of Inferred Resources⁴
- Increased scale Positions Equinox Gold as one of Canada's largest gold producers
- Enhanced long-term growth profile Consolidates expansion potential from Greenstone open pit and underground deposits as well as multiple gold deposits over a 100-km trend

Additional Low-cost Gold Production Increases Cash Flow

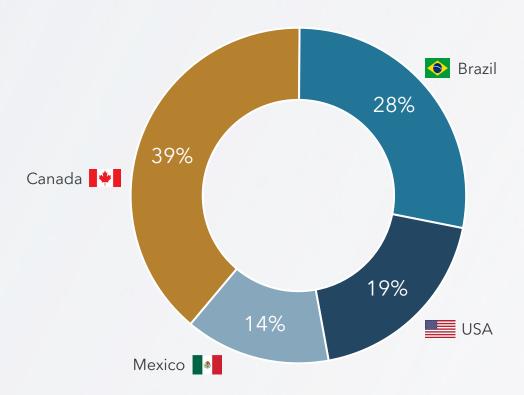

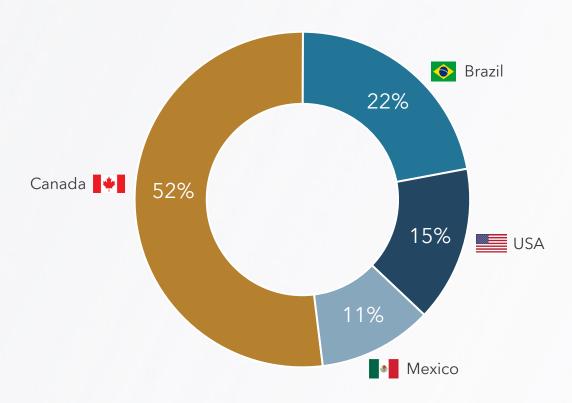

^{1.} Based on analyst consensus estimates at April 19, 2024 for production and all-in-sustaining costs. 2. Based on analyst consensus estimates at April 19, 2024 for current EBITDA. Pro forma EBITDA calculated using analyst consensus production, cash cost and gold price estimates.

Enhanced Diversification into Top-tier Mining Jurisdiction

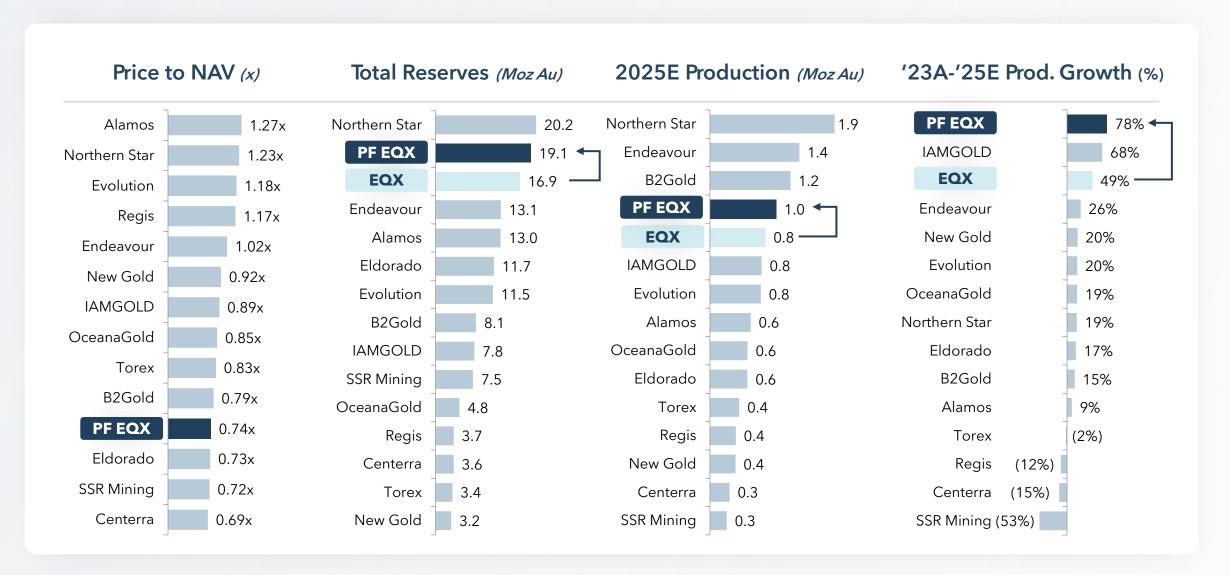

Current Consensus Net Asset Value by Region¹

Pro Forma Consensus Net Asset Value by Region with Additional 40% of Greenstone¹

Peer-leading Growth Profile

Greenstone Will Be a Cornerstone Asset for Equinox Gold

^{1.} Average annual production for the first five years.

^{2.} See Technical Disclosure.

Greenstone Will Be One of Canada's Largest Gold Mines...

Greenstone Will Be One of the World's Lowest-Cost Gold Mines

Opportunities to Extend Greenstone Mine Life, Increase Production

Greenstone underground

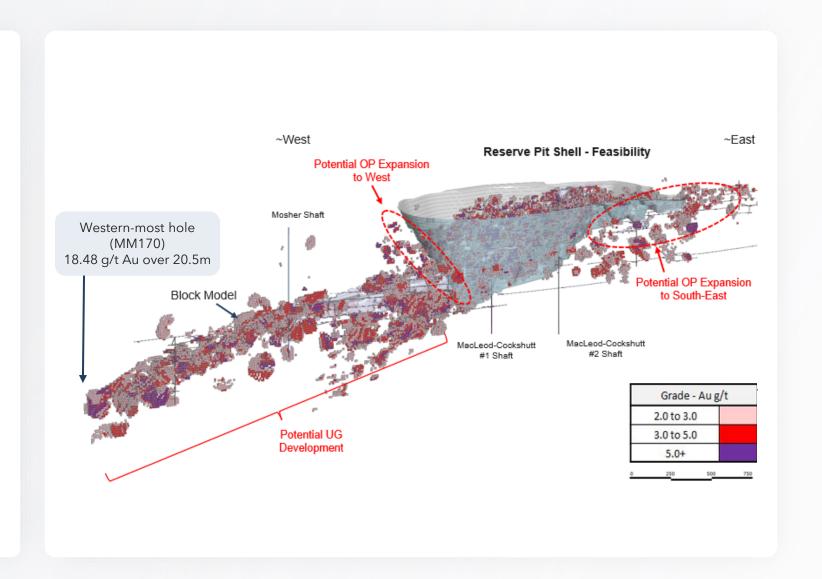

- 9.79 Mt at 3.93 g/t gold (1.2 Moz Indicated) and 24.59 Mt at 3.87 g/t gold (3.1 Moz Inferred)¹
- Not included in current mine life economics - analysis to be advanced through 2024

Greenstone open pit

 Potential expansion of the open-pit to the southeast and west

Expand throughput

 Power and equipment available and designed to support 30 ktpd throughput

Greenstone Near-mine & Belt-scale Exploration Potential

Pro Forma 2024 Guidance: 780,000 oz of Gold^{1, 2}

CURRENT GUIDANCE

660,000 - 750,000 oz of gold \$1,340 - \$1,445 cash costs per oz \$1,630 - \$1,740 AISC per oz

PRO FORMA GUIDANCE

730,000 - 830,000 oz of gold \$1,285 - \$1,390 cash costs per oz \$1,565 - \$1,675 AISC per oz

Additional ~740,000 oz Production Growth From Cornerstone Assets

^{1.} Average annual production attributable to Equinox Gold for the first five years when operating at capacity, as outlined in the December 2020 feasibility study; Pro forma consolidation of the Greenstone gold project as per pending transaction announced on April 23, 2024. 2. September 2021 pre-feasibility study showed 137,000 average annual production with 160,000 oz for three years. Feasibility study underway. 3. March 2021 feasibility study showed average annual production of 218,000 oz per year. Permitting underway. 4. October 2022 feasibility study showed 280,000 oz average annual production and 360,000 oz peak average annual production for five years. Timeline for construction not yet determined.

Revaluation As Production Grows Toward 1+ Moz

1 Moz = Scale, Diversified, Liquidity, Cash Flow

Increased production

Increased cash flow

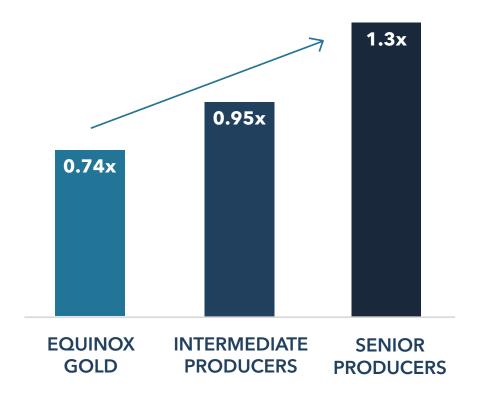

13-year avg.

Reduced costs

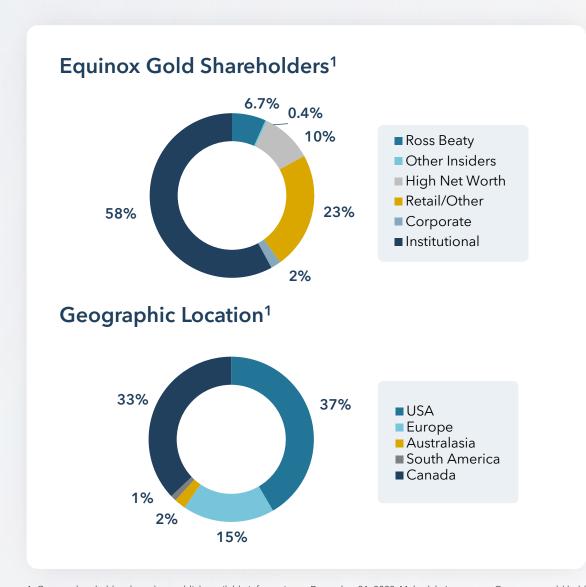

Reduced execution risk

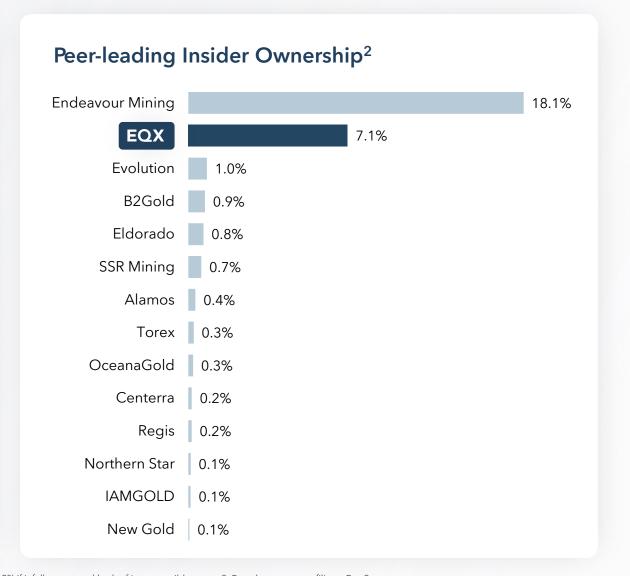

Enhanced diversification

Revalue as a Senior Producer²

Aligned with Investors

^{1.} Current shareholders based on publicly available information at December 31, 2023. Mubadala Investment Company would hold ~12% if it fully converted both of its convertible notes. 2. Based on company filings, FactSet, street research, Wood Mackenzie at March 31, 2024. Insider ownership considers only Executives and Directors who have personally invested to hold shares in the Company and does not include corporate shareholders.

2024 Targets

Greenstone	Pour first gold on schedule in May 2024 Ramp up to commercial production in Q3 2024 and more than 90% throughput by year-end 2024
Operations	Achieve production and cost guidance Renegotiate Los Filos community agreements to ensure long-term economic viability of the mine Excellence in responsible mining with strong safety, environmental and social performance Continue asset optimization program to increase efficiencies and reduce costs
Exploration	Replace reserves, grow resources
Development	Aurizona: Accelerate mining in Tatajuba pit, implement remediation plan for southeast Piaba pit, advance plans for underground mine Castle Mountain: Advance Phase 2 permitting and front-end engineering design Mesquite: Advance permitting for mine life extension

Gold Demand: Growing

Gold Supply: Constrained

- No major new discoveries in industry, total gold supply flat since 2014
- Despite interest rates, gold outperformed bonds, commodities and stock markets during 2023
- Gold trading volumes increasing, yield drop will encourage institutional interest in gold
- Investors switching asset classes from traditional stocks and bonds to commodities, including gold
- Heightened geopolitical tension in key election year for many major economies provides additional support for gold
- Central Bank and massive Asian retail buying have pushed gold to all-time highs to date in 2024

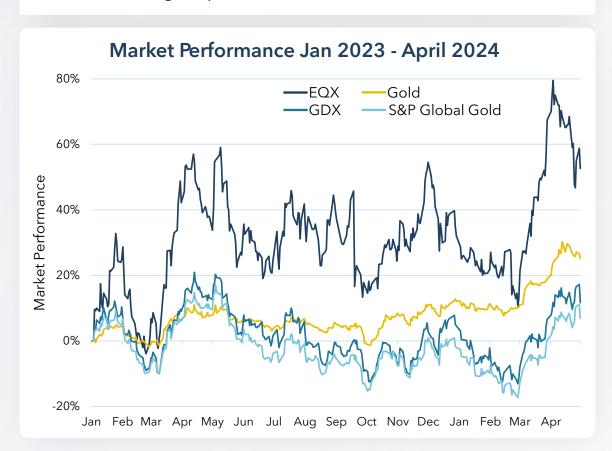

Macro

- Inflation: Has peaked but costs have stayed high; gold tends to outperform in a stagflation environment
- Interest rates: US Fed pivot to easing should drive gold to new record prices
- US economy: US\$ should weaken as tightening eases
- Global unrest: Russian/Ukraine and Israel/Palestine wars and recession concerns make gold a valuable risk hedge

Equinox Gold Outperforms With Rising Gold Prices

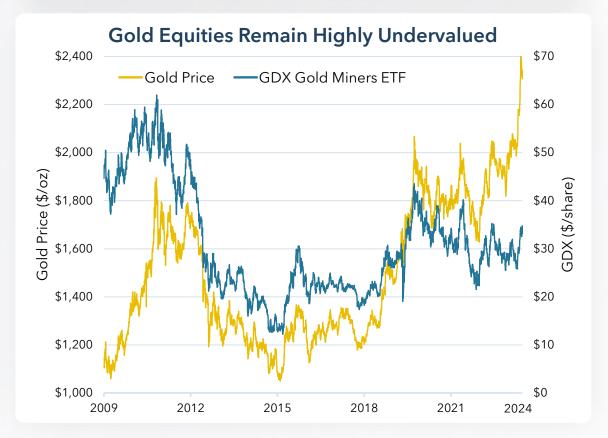

EQX offers highest leverage to gold

Equinox Gold's operating margins increase ~30% with a 5% increase in gold price¹

Gold equities undervalued

Gold equities remain highly undervalued compared to historical gold:equity ratios

2024 Will Be a Transformative Year for Equinox Gold

Exposure to strong and rising gold prices

Near-term, low-cost production growth from a world-class mine at the beginning of its mine life in one of the world's best mining jurisdictions

Increased cash flow with lower consolidated operating costs

Greenstone production and consolidation transforms EQX into a large gold producer

Appendix

ANALYST COVERAGE

BMO Capital Markets, Canaccord Genuity, CIBC World Markets, Cormark Securities, Desjardins Securities, Haywood Securities, National Bank Financial, Scotiabank, RBC Capital Markets, TD Securities

- 1. Basic basis at May 8, 2024, as announced in the Company's Q1 2024 MD&A.
- 2. Weighted average option exercise prices are shown at the price that would be paid to Equinox Gold to receive one full EQX share. Option numbers are shown as the number of common shares that would be issued upon exercise of the securities.
- 3. Restricted Share Units are shares committed to management and directors that are issued subject to time-based and performance-based vesting terms, as part of equity-based compensation.
- 4. Fully diluted shares outstanding includes the Mubadala, Verition and Pacific Road convertible notes and the convertible note issued on September 21, 2023. See footnote 8.
- 5. Average daily shares traded since January 2023.
- 6. Equinox Gold had \$125 M in unrestricted cash at the end of March 31, 2024, drew \$60 M on its revolving credit facility on April 9, 2024 and on April 26, 2024 completed an equity financing for \$266 M, of which \$205 M was used to fund the acquisition of an additional 40% of the Greenstone Mine, as announced on April 23, 2024
- 7. Equinox Gold has a \$700 M revolving credit facility, of which \$535 M was drawn at March 31, 2024. An additional \$60 M was drawn on April 9, 2024. In addition, the Company has arranged a new \$500 M Term Loan to fund the acquisition of an additional 40% of the Greenstone Mine, that will be completed when the Transaction closes.
- 8. Face value of the convertible notes held by Mubadala Investment Company, Verition Advisors (Canada) ULC, Pacific Road Resources Fund and various holders. Mubadala and Verition hold notes of \$130 M and \$9.7 M, respectively, convertible at a fixed US\$ price of \$5.25 per share at the holders' option, expiring in October 2024. Mubadala and Pacific Road hold notes of \$130 M and \$9.3 M, respectively, convertible at a fixed US\$ price of \$6.50 per share at the holders' option, expiring in September 2025. A number of investors hold notes totaling \$172.5 expiring in October 2028 with a conversion price of US\$6.30 per share. If all convertible notes were fully converted, the Company would issue 75.4 M shares.
- 9. Calculated using the May 8, 2024 share price for Equinox Gold.

Technical Disclosure

National Instrument 43-101

Scientific and technical information concerning the Los Filos Mine Complex is summarized, derived, or extracted from the "Updated Technical Report for the Los Filos Mine Complex, Mexico" dated June 30, 2022 with an effective date of October 19, 2022. The Los Filos technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold's website at www.equinoxgold.com, on Equinox Gold's profile on SEDAR+ at www.sedarplus.ca and on Equinox Gold's profile on EDGAR at www.sec.gov/edgar. Scientific and technical information concerning the Mesquite Mine is summarized, derived, or extracted from the "Technical Report on the Mesquite Gold Mine, Imperial County, California, U.S.A." prepared by AGP Mining Consultants Inc. dated April 27, 2020 with an effective date of December 31, 2019. The Mesquite technical report has been filed with Canadian securities regulatory authorities and is available for review on the Company's website and on Equinox Gold's profile on SEDAR+. Mesquite Mineral Reserve and Mineral Resources were updated at June 30, 2020 with the results announced in a news release dated October 8, 2020 which is available on Equinox Gold's website, on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov/edgar. Scientific and technical information concerning the Aurizona Mine is summarized, derived, or extracted from the "Technical Report on the Aurizona Gold Mine Expansion Pre-Feasibility Study" prepared by AGP Mining Consultants Inc. dated November 4, 2021 with an effective date of September 20, 2021. The Aurizona technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold's website, on SEDAR+ and on EDGAR. Scientific and technical information concerning the Fazenda Mine is summarized, derived, or extracted from the "NI 43-101 Technical Report on the Fazenda Brasileiro Mine, Bahia State, Brazil" prepared by Equinox Gold Corp. dated October 22, 2021 with an effective date of December 31, 2020. The Fazenda technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold's website, on SEDAR+ and on EDGAR. Scientific and technical information concerning the RDM Mine is summarized, derived, or extracted from the "NI 43-101 Technical Report on the Riacho dos Machados Gold Mine, Minas Gerais, Brazil" prepared by Equinox Gold Corp. dated October 22, 2021 with an effective date of December 31, 2020. The RDM technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold's website, on SEDAR+ and on EDGAR. Scientific and technical information concerning the Castle Mountain Mine is summarized, derived, or extracted from the "Technical Report on the Castle Mountain Project Feasibility Study" prepared by M3 Engineering & Technology Corp. dated March 17, 2021 with an effective date of February 26, 2021. The Castle Mountain technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold's website, on SEDAR+ and on EDGAR. Scientific and technical information concerning the Santa Luz Project is summarized, derived, or extracted from the "NI 43-101 Technical Report on the Santa Luz Project, Bahia State, Brazil" prepared by Equinox Gold Corp. dated November 30, 2020 with an effective date of June 30, 2020. The Santa Luz technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold's website, on SEDAR+ and on EDGAR. Scientific and technical information concerning the Greenstone Project is summarized, derived, or extracted from the "NI 43-101 Technical Report, Hardrock Project, Ontario, Canada" prepared by G. Mining Services Inc. for Premier Gold Mines Limited dated January 26, 2021 with an effective date of December 16, 2020. The Greenstone technical report is available on Equinox Gold's website and on SEDAR+ under Premier Gold's profile.

Scientific and technical information concerning the Hasaga Property is summarized, derived, or extracted from the "National Instrument 43-101 Technical Report: Hasaga Project Red Lake Mining District, Ontario, Canada NTS MAP Sheets 52K/13 AND 52N/04" prepared by MRB & Associates for Premier Gold with an effective date of December 30, 2016. The Hasaga technical report is available on SEDAR+ under Premier Gold's profile.

Readers are reminded that results outlined in the technical reports for some of these projects are preliminary in nature and may include Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves.

There is no certainty that the mine plans and economic models contained in any of the reports will be realized. Readers are further cautioned that Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Readers are also advised to refer to the latest annual information form and technical reports of the Companies as well as other continuous disclosure documents filed by the Companies, which are available on SEDAR+, for detailed information (including qualifications, assumptions and notes set out accordingly) regarding the Mineral Reserve and Mineral Resource information contained in this document.

Qualified Persons

Doug Reddy, MSc, P.Geo., Equinox Gold's COO, is a Qualified Person under NI 43-101 for Equinox Gold and has reviewed and approved the technical information in this presentation. Scott Heffernan, MSc, P.Geo, Equinox Gold's EVP Exploration, is a Qualified Person under NI 43-101 for Equinox Gold and has reviewed and approved the technical information in this presentation related to exploration results and Mineral Reserve and Mineral Resource estimates.

Doug Reddy and Scott Heffernan have reviewed the technical reports for the Greenstone and the Hasaga Property for Equinox Gold. To the best of Equinox Gold's knowledge, information and belief, there is no new material scientific or technical information that would make the disclosure of the mineral resource and mineral reserves or other technical information for the Greenstone Project or the Hasaga Property inaccurate or misleading.
