Creating the Premier Americas Gold Producer

PRO FORMA CORPORATE PRESENTATION

JUNE 2025

Cautionary Notes

Forward-looking Statements. This presentation contains certain forward-looking information and forward-looking statements within the meaning of applicable securities legislation and may include future-oriented financial information or financial outlook information (collectively “Forward-looking Information”). Actual results of operations and the ensuing financial results may vary materially from the amounts set out in any Forward-looking Information. Forward-looking Information in this presentation relates to, among other things: expected pro-forma 2025 production and cost guidance; the expected benefits of the business combination with Calibre (the “Transaction”) and the attributes of Equinox Gold post-Transaction; the anticipated receipt of all required approvals for the Transaction and timing for consummation of the Transaction; the strategic vision for Equinox Gold, and expectations regarding exploration potential, production capabilities, future financial or operating performance, investment returns and share price performance; expectations for the operation of Greenstone, including future financial or operating performance and anticipated improvements in recovery rates, mining rates and throughput to achieve design capacity; expectations for completing construction and commissioning at Valentine; expectations for the timing and advancement of the Company’s growth and development projects, including the expansions at Castle Mountain and Aurizona; the ability to successfully renegotiate new long-term agreements at Los Filos and the duration of the suspension of operations at Los Filos if those negotiations are unsuccessful; balance sheet strength, liquidity and future cash requirements; ability to convert Mineral Resources to Mineral Reserves; and expectations for future success of the combined management team. Forward-looking Information is generally identified by the use of words like “believe”, “will”, “achieve”, “strategy”, “plan”, “vision”, “improve”, “intend”, “anticipate”, “expect”, “estimate”, and similar expressions and phrases or statements that certain actions, events or results “may”, “could”, or “should”, or the negative connotation of such terms, are intended to identify Forward-looking Information. Although the Company believes that the expectations reflected in such Forward-looking Information are reasonable, but undue reliance should not be placed on Forward-looking Information since the Company can give no assurance that such expectations will prove to be correct. Forward-looking information is based on Equinox Gold and Calibre’s current expectations for future events and these assumptions include: the ability to successfully combine the assets and teams of Equinox Gold and Calibre; the ability to meet exploration, production, cost and development goals, including expected completion of Valentine construction and commissioning and the successful ramp-up to design capacity at Greenstone; gold prices remaining as estimated; no unplanned delays or interruptions; ore grades and recoveries remain consistent with expectations; expectations regarding the financial impact of tariffs; expectations for the impact of macroeconomic factors on the Company’s operations, share price performance and gold price; currency exchange rates remaining as estimated; availability of funds for projects and future cash requirements; prices for energy inputs, labour, materials, supplies and services remaining as estimated; the accuracy of Mineral Reserve and Mineral Resource estimates and the assumptions on which they are based; and the ability of Equinox Gold to work productively with its Indigenous partners at Greenstone and its community partners at Los Filos. Forward-looking Information is based on information available at the time those statements are made and/or good faith belief of the officers and directors of Equinox Gold as of that time with respect to future events and are subject to risks and uncertainties that could cause actual results to differ materially from those expressed in or suggested by the Forward-looking Information. Forward-looking Information involves numerous risks, uncertainties and other factors that may cause actual results and developments to differ materially from those expressed or implied by such Forward-looking Information. Such factors include, without limitation, risks relating to: changes in the gold price; Canadian and United States sanctions on Nicaraguan operations; the financial impact that tariffs placed on Canada or Mexico by the United States and risks related to retaliatory tariffs placed on the United States by either Canada or Mexico; new members of management and the board of Equinox Gold; fluctuations in prices for energy inputs, labour, materials, supplies and services; fluctuations in currency markets; operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, geotechnical failures, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding, fire and severe weather); inadequate insurance, or inability to

obtain insurance to cover these risks and hazards; relationships with, and claims by, local communities and Indigenous populations; Equinox Gold’s ability to obtain all necessary permits, licenses and regulatory approvals in a timely manner or at all; changes in laws, regulations and government practices, including mining laws, and the factors identified in the section titled “Risks Related to the Business” in Equinox Gold’s most recently filed Annual Information Form which is available on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov/edgar and in the section titled “Risk Factors” in Calibre’s most recently filed Annual Information Form which is available on SEDAR+ at www.sedarplus.ca. Forward-looking Information is designed to help readers understand Equinox Gold’s views as of that time with respect to future events and speak only as of the date they are made. Except as required by applicable law, Equinox Gold assumes no obligation to update or to publicly announce the results of any change to any Forward-looking Information to reflect actual results, future events or developments, changes in assumptions or changes in other factors affecting the Forward-looking Information. If Equinox Gold updates any Forward-looking Information, no inference should be drawn that the Company will make additional updates with respect to that or other Forward-looking Information. All Forward-Looking Information contained in this presentation is expressly qualified in its entirety by this cautionary statement.

Non-IFRS Measures. This presentation refers to all-in sustaining costs (AISC) per ounce sold, sustaining capital and EBITDA (earnings before interest, taxes, depreciation and amortization) which are measures with no standardized meaning under International Financial Reporting Standards (IFRS) and may not be comparable to similar measures presented by other companies. Their measurement and presentation are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Non-IFRS measures are widely used in the mining industry as measurements of performance and the Company believes that they provide further transparency into costs associated with producing gold and will assist analysts, investors and other stakeholders of the Company in assessing its operating performance, its ability to generate free cash flow from current operations and its overall value. Refer to the “Non-IFRS measures” section of the Equinox Gold’s MD&A for the year ended December 31, 2024, and the “Non-IFRS measures” section of Calibre’s MD&A for the year ended December 31, 2024, for a more detailed discussion of these non-IFRS measures and their calculation.

Cautionary Note to U.S. Readers Concerning Estimates of Mineral Reserves and Mineral Resources. Disclosure regarding mineral properties included in this presentation, was prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (NI 43-101). NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. NI 43-101 differs significantly from the disclosure requirements of the Securities and Exchange Commission (the SEC) generally applicable to U.S. companies. Accordingly, information contained in this presentation is not comparable to similar information made public by U.S. companies reporting pursuant to SEC disclosure requirements.

Numbers may not sum due to rounding. **All dollar amounts in USD unless otherwise noted.**

Information in this presentation is presented pro forma the merger with Calibre Mining, as announced on February 23, 2025, unless otherwise noted. The merger is expected to close around the end of June 2025.

Pro Forma Equinox Gold: New Focus, New Opportunity

- ✓ New **high-quality, long-life gold mines in Canada** provide tier-1 foundation to drive free cash flow generation and valuation
- ✓ **Exceptional jurisdictional risk profile** with +65% NAV in Canada and USA¹
- ✓ **Peer-leading gold endowment** with 23 Moz of Reserves and 22 Moz of Resources²
- ✓ **Re-rate potential** with achievement of production and cash flow milestones³
- ✓ Strong **pipeline of production growth** opportunities and significant exploration upside
- ✓ New **leadership team** with a track record of delivering on commitments

Diversified Portfolio Weighted to Canada
(Pro Forma Consensus Analyst NAV by Region)¹

1. Based on analyst consensus estimates at May 30, 2025. Percentage each jurisdiction represents of the NAV attributed to pro forma Equinox Gold's mineral properties. 2. See Appendix slides, Cautionary Notes and Technical Disclosure. M&I Resources are exclusive of Reserves. 3. Based on analyst consensus estimates at May 30, 2025 showing Equinox Gold valued at 0.7x NAV versus peer average of 1.1x NAV and senior producer average of 1.3x NAV.

Inflection Point: Revaluation Potential as Equinox Gold Delivers Canadian Mines

Ramping up Greenstone and Valentine delivers

- Enhanced diversification in top mining jurisdictions
- Increased production
- Increased cash flow
- Longer average mine life
- Reduced costs
- Reduced execution risk
- Improved liquidity
- Ability to return capital to shareholders

Additional organic growth from pipeline of projects

Revalue as a Senior Producer¹

1. Based on analyst consensus estimates available at May 30, 2025.

Why Invest in Equinox Gold?

**Exceptional leverage
to strong and rising
gold prices**

**Near-term production
growth from two
world-class mines at
the beginning of their
mine lives in one of
the world's best
mining jurisdictions**

**Increased cash flow,
lower consolidated
operating costs,
stronger
balance sheet
and resilience**

**Greenstone +
Valentine makes
Equinox Gold a
Canadian gold
powerhouse**

AT AN ATTRACTIVE VALUATION

Trading at \$5,833 EV/oz Production vs Peer Group Average of \$11,157/oz¹

ANALYST COVERAGE

BMO Capital Markets, Canaccord Genuity, CIBC World Markets, Cormark Securities, Global Mining Research, Haywood Securities, National Bank Financial, RBC Capital Markets, Scotiabank, Stifel, TD Securities

1. Basic common shares pro forma the merger with Calibre Mining, which is expected to close around the end of June 2025..

2. Weighted average exercise price shown is the price that would be paid to Equinox Gold to receive one full Equinox Gold common share. Option and warrant numbers are shown as the number of common shares that would be issued upon exercise of the securities.

3. Restricted Share Units are shares committed to management and directors that are issued subject to time-based and performance-based vesting terms, as part of equity-based compensation.

4. Fully diluted shares outstanding includes the common shares issued should the convertible notes be converted. See footnote 8.

5. Average daily shares traded since January 2024.

6. Equinox Gold cash on hand at March 31, 2025, as reported in the Q1 2025 financial statements, plus Calibre Mining cash on hand at April 30, 2025.

7. Equinox Gold has a \$700 M Revolving Credit Facility, of which \$635 M was drawn at March 31, 2025; another \$45 M was drawn on April 14, 2025. Equinox Gold also has a \$100 M accordion feature that is subject to lender approval prior to being available for draw. Pro forma the merger, Equinox Gold will assume Calibre Mining's debt comprising a \$328 M Sprott Loan and an \$8 M Lafise Bank Loan.

8. Face value of three convertible notes: \$139.3 M note convertible at US\$6.50 per common share expiring in September 2025, \$172.5 M note convertible at US\$6.30 per common share expiring in October 2028 and Calibre Mining's \$35 M note convertible at C412.14 per Equinox Gold common shares expiring in March 2030. If all notes were fully converted, Equinox Gold would issue 52.9 M common shares.

9. Calculated using the June 10, 2025 share price for Equinox Gold.

Guidance does not include production from Valentine, Los Filos or Castle Mountain

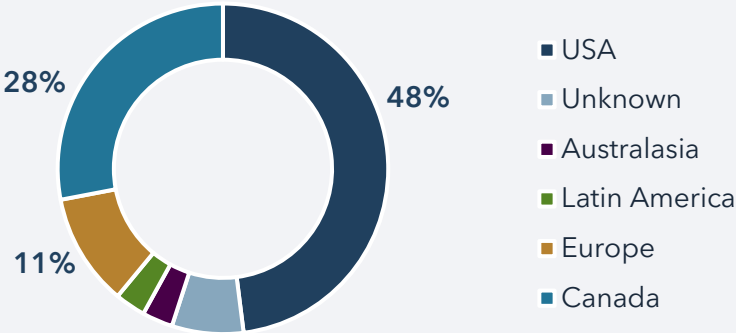

1. Pro forma consolidated guidance as announced on June 11, 2025. Guidance is for full-year 2025 production and cost performance, including from Calibre Mining's assets from January 1, 2025. 2. Total cash costs, all-in sustaining costs and growth capital (non-sustaining capital) are non-IFRS measures. See *Cautionary Notes*. 3. The Company may revise guidance during the year to reflect changes to expected results. Guidance does not include production from Valentine, which is on track to pour gold in Q3 2025; from Castle Mountain, which is in residual leaching; or from Los Filos, at which operations were suspended indefinitely on April 1, 2025.

Significant Insider Ownership: Aligned with Investors

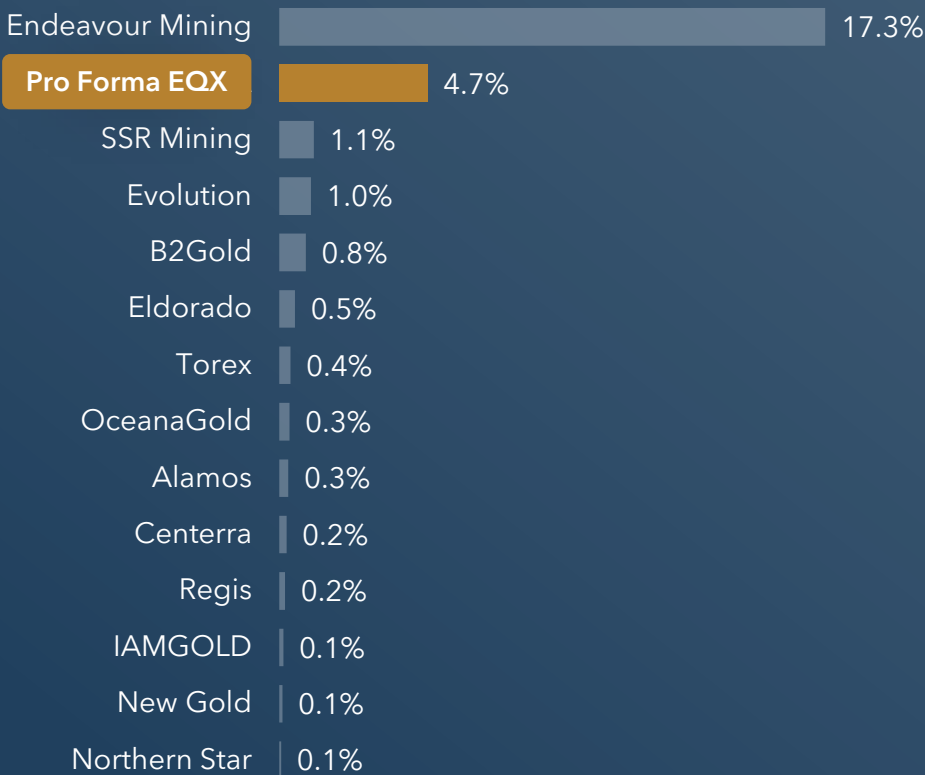

Equinox Gold Shareholders¹

Geographic Location¹

Peer-leading Insider Ownership²

1. Current Equinox Gold and Calibre shareholders based on publicly available information at May 30, 2025. 2. Based on company filings, FactSet, street research, Wood Mackenzie at May 30, 2025. Insider ownership considers only Executives and Directors who have personally invested to hold shares in the Company.

Responsible Mining: Committed to Excellence¹

SAFETY

TRIFR² of 2.21 in 2024,
30% better than target

Ten lost-time injuries,
one fatality in 2024

Four sites had no
lost-time injuries in 2024

Greenstone transitioned
into operations and had no
lost-time injuries in 2024

ENVIRONMENT

SEIFR³ of 0.20 in 2024,
84% better than target

No significant incidents in
Q2-Q4 2024

Strategy to reduce GHG⁴
emissions by 25% by
2030 compared to

updates on the Company's
management of tailings and
heap leach facilities, water
stewardship initiatives and
GHG reduction initiatives

Improved S&P Corporate
Sustainability Assessment
score by 13% vs 2023

1. Equinox Gold 2024 ESG performance. 2. Total recordable injury frequency rate per million hours worked. 3. Significant environmental incident frequency rate (as defined by Equinox Gold's reporting standards, which are outlined in the Company's ESG Report) per million hours worked. 4. Greenhouse gas emissions.

Nicaragua Operations: Cash-flowing Business Unit

Established operating history

- Limon and Libertad are prolific mining districts with >6 Moz of historical gold production
- Consistent reserve replacement, increased gold reserves >1.1 Moz¹

Operating strategy

- 2.7 Mt of total installed mill capacity, ~70% utilized
- Excellent infrastructure: highway haulage costs ~\$0.12 per tonne-km

Consistent exploration success

- Year-over-year reserve and resource expansion
- New high-grade discoveries at both Limon and Libertad

Platform for growth

- Achieved permit-to-plant mine development in less than 18 months
- More than 100 km of exploration drilling underway

1. Refer to the Calibre news release dated May 7, 2025.

Brazil Operations: Cash-flowing Business Unit

Aurizona Mine, Maranhão, Brazil

Open-pit mine with 8,000 tpd CIL plant

Production ~100,000 oz per year¹

Expansion potential to ~140,000 oz per year with development of underground deposit and additional near-mine open-pit deposits²

Underground portal and decline will begin in late 2025

Near-mine and regional exploration potential

Bahia Complex, Bahia, Brazil

Combined unit with two processing plants

- Santa Luz, open-pit with resin-in leach plant
- Fazenda, open-pit/underground with CIL plant

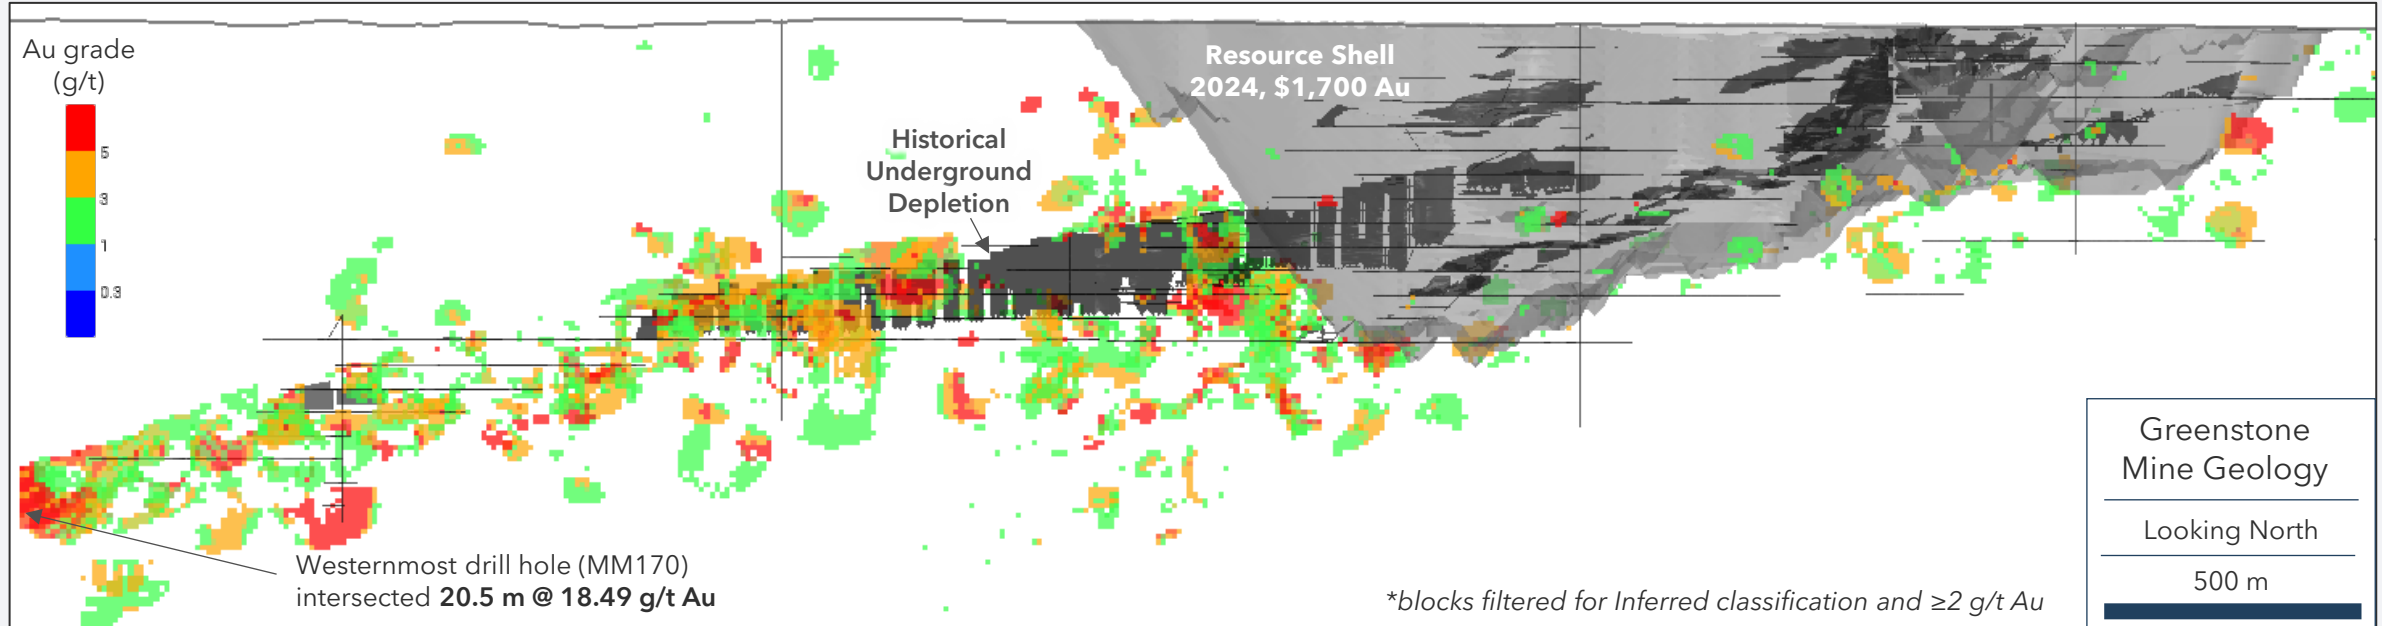

Combined production ~135,000 oz per year³

Upside potential with higher grades at Fazenda and improved recoveries at Santa Luz

Significant exploration potential along the 70-km greenstone belt that hosts the two mines

1. Aurizona commenced production in Q3 2019 and has consistently produced 100-120,000 oz of gold until 2024, when a geotechnical event in the main Piaba pit affected mining and production for three months. Guidance for 2025 is 70-90,000 oz of gold as Equinox Gold mines from a lower-grade pit and completes remediation work in the Piaba pit. 2. September 2021 pre-feasibility study showed 137,000 average annual production with 160,000 oz for three years. See *Technical Disclosure* and *Cautionary Notes*. 3. Mid-point of pro forma consolidated 2025 guidance.

Greenstone Upside: Extend Mine Life, Increase Production

Expand throughput

- Power and equipment available and designed to support 30 ktpd throughput

Greenstone open pit

- Potential expansion of the open-pit to the west
- Convert inferred resources within the pit

Greenstone underground

- 10.96 Mt at 4.20 g/t gold (1.5 Moz Indicated) and 19.48 Mt at 3.88 g/t gold (2.4 Moz Inferred)¹
- Not included in current mine life economics

1. See Measured & Indicated Resources, Inferred Resources, Technical Disclosure and Cautionary Notes.

Greenstone Upside: Near-mine and Belt-scale Exploration Potential

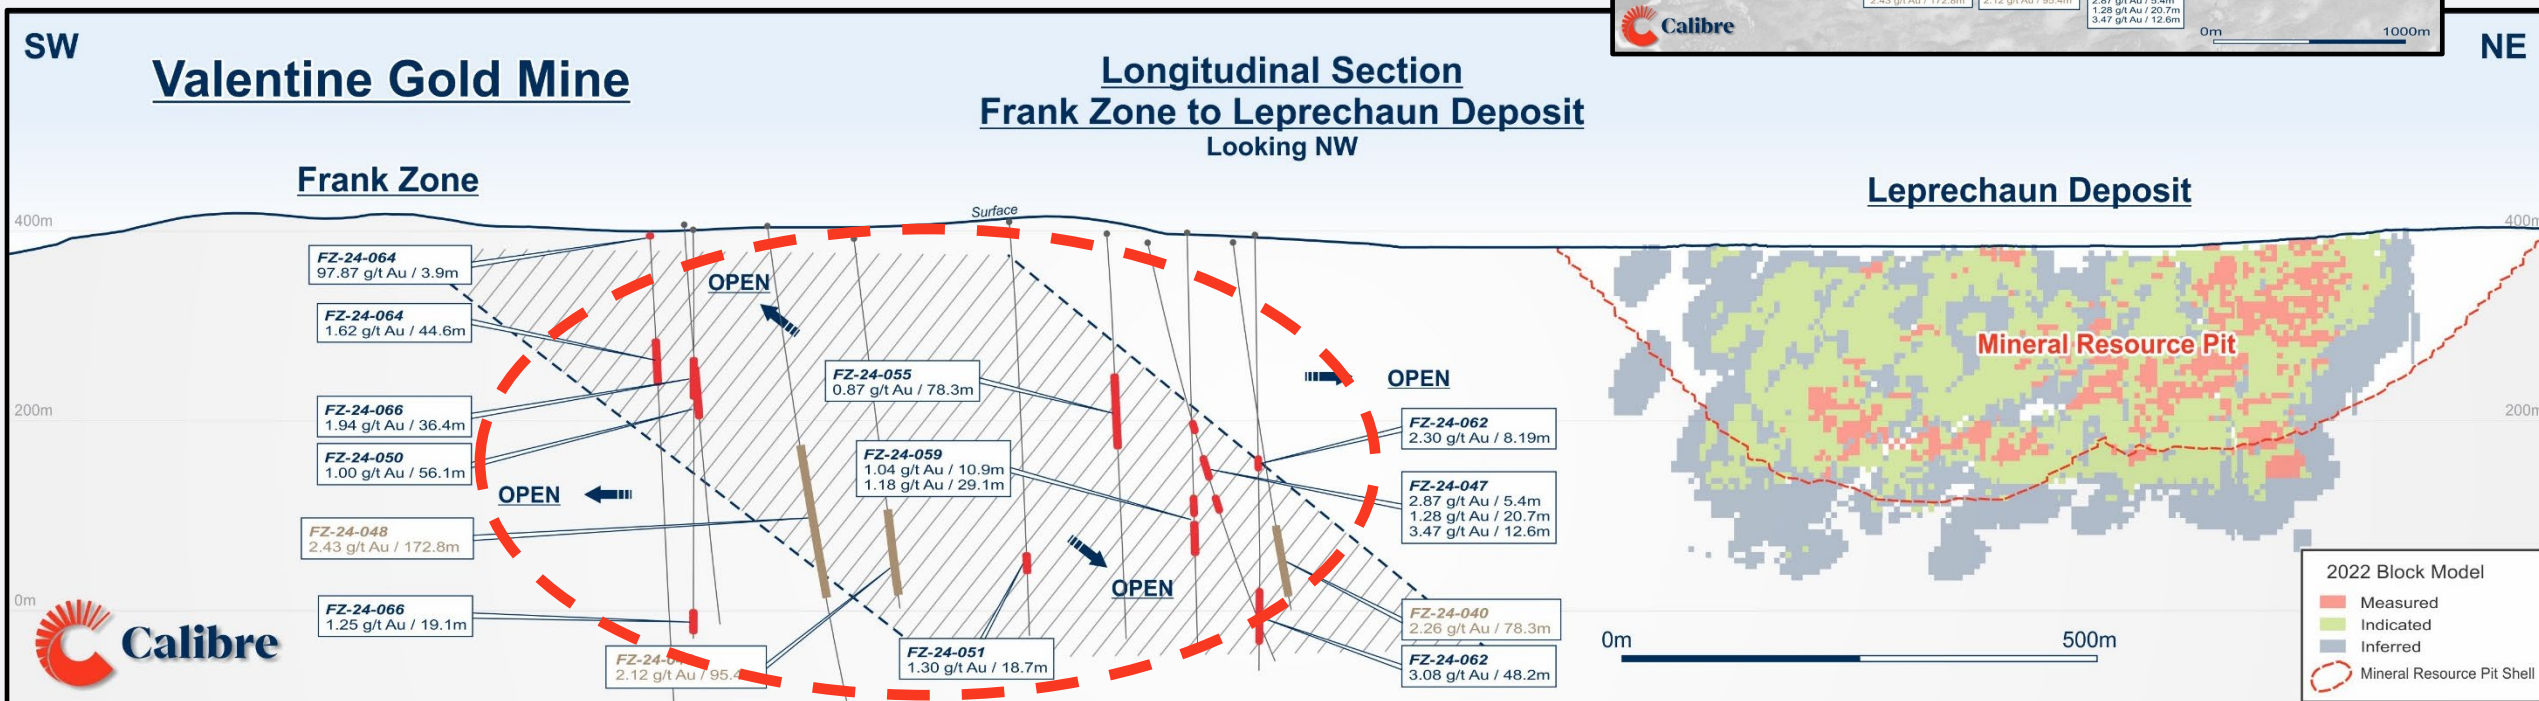

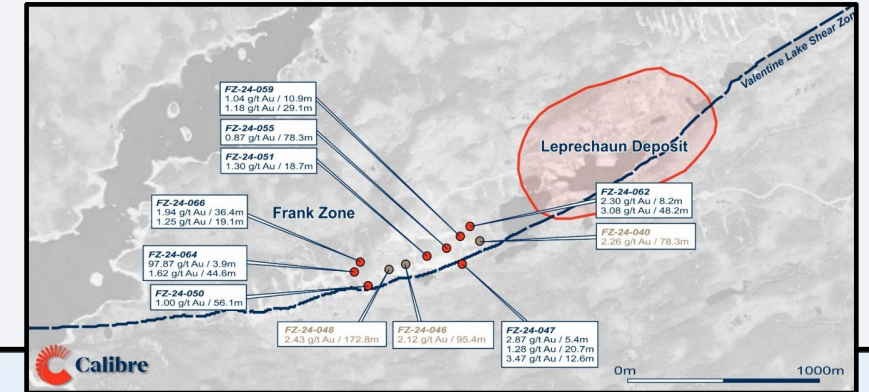

Excellent discovery and growth potential within the Beardmore-Geraldton Belt including:

- Two past-producing targets with combined 500 koz of M&I resources¹ within trucking distance
- Brookbank Deposit hosts 600 koz M&I resources¹ in high-grade open-pit and underground deposit
- Beardmore Property hosts three past-producing mines with historical production of >1 Moz at grades >10 g/t gold with no modern exploration
- 396 km² land package with little to no modern exploration and >4 Moz gold historical production

1. See Measured & Indicated Mineral Resources, Inferred Mineral Resources, Technical Disclosure and Cautionary Notes.

Valentine Upside: Multi-kilometre Shear Zone with Significant New Discovery

- Discovery of new high-grade gold trending southwest towards new Frank Zone discovery indicates strong resource expansion potential¹
- Frank Zone discovery indicates potential for additional open pit¹
 - 2.43 g/t Au over 172.8 metres, including 3.84 g/t Au over 90.9 metres and 2.12 g/t Au over 95.4 metres
 - 2.26 g/t Au over 78.3 metres, 3.08 g/t Au over 48.2 metres, 1.94 g/t Au over 36.4 metres, 1.62 g/t Au over 44.6 metres

1. Refer to the Calibre news releases November 25, 2024, February 5, 2025 and February 11, 2025.

Exploration Upside: Demonstrated Track Record of Exploration Success

2025 Exploration Strategy¹

Pan

\$5-\$10 M, deep targets

Mesquite

\$2-\$3 M, resource expansion

Limon / Libertad

\$25-\$30 M, new discovery and resource growth

Aurizona

\$6 M, resource expansion, regional exploration

Bahia Complex

\$17 M, reserve replacement, resource expansion, regional exploration

2025 Exploration Strategy¹

Greenstone

\$2 M, resource expansion
\$1 M, regional exploration

Valentine

\$15-\$20 M, advanced discovery drilling,
new greenfield drilling

1. Budget and plans are subject to change.

Core Development Asset: Castle Mountain in California, USA

~220,000 oz gold

EXPECTED PER YEAR

14+ year

Technical Disclosure

National Instrument 43-101

Scientific and technical information concerning the Los Filos Mine Complex is summarized, derived, or extracted from the "Updated Technical Report for the Los Filos Mine Complex, Mexico" dated June 30, 2022 with an effective date of October 19, 2022. Scientific and technical information concerning the Greenstone Gold Mine is summarized, derived, or extracted from the "Technical Report on the Greenstone Gold Mine, Geraldton, Ontario" dated October 1, 2024 with an effective date of June 30, 2024. Scientific and technical information concerning the Mesquite Mine is summarized, derived, or extracted from the "Technical Report on the Mesquite Gold Mine, Imperial County, California, U.S.A." prepared by AGP Mining Consultants Inc. dated April 27, 2020 with an effective date of December 31, 2019. Mesquite Mineral Reserve and Mineral Resources were updated at June 30, 2020 with the results announced in a news release dated October 8, 2020. Scientific and technical information concerning the Aurizona Mine is summarized, derived, or extracted from the "Technical Report on the Aurizona Gold Mine Expansion Pre-Feasibility Study" prepared by AGP Mining Consultants Inc. dated November 4, 2021 with an effective date of September 20, 2021. Scientific and technical information concerning the Fazenda Mine is summarized, derived, or extracted from the "Technical Report on the Fazenda Gold Mine, Bahia State, Brazil" prepared by Equinox Gold Corp. dated January 31, 2025 with an effective date of June 30, 2024. Scientific and technical information concerning the RDM Mine is summarized, derived, or extracted from the "NI 43-101 Technical Report on the Riacho dos Machados Gold Mine, Minas Gerais, Brazil" prepared by Equinox Gold Corp. dated October 22, 2021 with an effective date of December 31, 2020. Scientific and technical information concerning the Castle Mountain Mine is summarized, derived, or extracted from the "Technical Report on the Castle Mountain Project Feasibility Study" prepared by M3 Engineering & Technology Corp. dated March 17, 2021 with an effective date of February 26, 2021. Each of these Technical Reports has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold's website at www.equinoxgold.com, on Equinox Gold's profile on SEDAR+ at www.sedarplus.ca and on Equinox Gold's profile on EDGAR at www.sec.gov/edgar.

Scientific and technical information concerning the Valentine Mine is summarized, derived, or extracted from the "Valentine Gold Project NI 43-101 Technical Report and Feasibility Study, Newfoundland and Labrador, Canada" dated December 20, 2022 with an effective date of November 30, 2022. Scientific and technical information concerning the La Libertad Complex is summarized, derived, or extracted from the "Technical Report on La Libertad Complex, Nicaragua, Report for NI 43-101" dated March 29, 2022 with an effective date of December 31, 2021. Scientific and technical information concerning the El Limon Mine is summarized, derived, or extracted from the "Technical Report on El Limon Complex, Leon and Chinandego Departments, Nicaragua, Report for NI 43-101" dated March 30, 2021 with an effective date of December 31, 2020. Scientific and technical information concerning the Pan Mine is summarized, derived, or extracted from the "NI 43-101 Updated Technical Report on Resources and Reserves, Pan Gold Project,

White Pine County, Nevada" dated March 16, 2023 with an effective date of December 31, 2022. Each of these Technical Reports has been filed with Canadian securities regulatory authorities and is available for review on Calibre's website at www.calibremining.com and on Calibre Mining's profile on SEDAR+ at www.sedarplus.ca.

Readers are reminded that results outlined in the technical reports for some of these projects are preliminary in nature and may include Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves.

There is no certainty that the mine plans and economic models contained in any of the reports will be realized. Readers are further cautioned that Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Readers are also advised to refer to the latest annual information form and technical reports of the Companies as well as other continuous disclosure documents filed by the Companies, which are available on SEDAR+, for detailed information (including qualifications, assumptions and notes set out accordingly) regarding the Mineral Reserve and Mineral Resource information contained in this document.

Technical Information

The scientific and technical information contained in presentation related to Equinox Gold assets was approved by Doug Reddy, MSc, P.Geo, Equinox Gold's Chief Operating Officer and Scott Heffernan, M.Sc., P.Geo., Equinox Gold's EVP Exploration, both a "Qualified Person" under National Instrument 43-101 (NI 43-101). Philippe LeBleu, P.Eng., Equinox Gold's VP Mining Engineering, has approved the information related to the Mineral Reserves and Mineral Resources at Equinox Gold's properties, and is a "Qualified Person" under NI 43-101. The scientific and technical information contained in this presentation related to Calibre assets was approved by David Schonfeldt P.Geo., Calibre's Corporate Chief Geologist and a "Qualified Person" under NI 43-101.
