

Delivering a Top Quartile Gold Producer

OCTOBER 2025

Equinox Gold is positioned for growth with a strong foundation of high-quality, long-life gold operations in Canada and across the Americas, and a pipeline of expansion projects. Founded and chaired by renowned mining entrepreneur Ross Beaty and guided by a seasoned leadership team with broad expertise, the Company is focused on disciplined execution, operational excellence, and long-term value creation. Equinox Gold offers investors meaningful exposure to gold with a diversified portfolio and clear path to growth.

DELIVERING SCALE AND DIVERSIFICATION

Equinox Gold was formed at the end of 2017 with the strategic vision of building a company that will responsibly and safely produce more than one million ounces of gold annually, bring long-term social and economic benefits to its host communities, create a safe and rewarding workplace for its employees and contractors, and provide above-average investment returns to its shareholders.

To achieve its growth objectives, Equinox Gold has constructed five new mines and also completed a number of strategic mergers: with Leagold Mining in 2020, Premier Gold in 2021 and Calibre Mining in 2025. In addition to its Greenstone Gold Mine in Ontario, Canada, the merger with Calibre Mining gave Equinox Gold the Valentine Gold Mine, a second high-quality, long-life mine in Newfoundland, Canada. When Greenstone and Valentine are ramped up to capacity, Equinox Gold will be the second largest producer of gold from Canada.

In addition to the ~300,000 ounces of production growth over the next six months from the Greenstone and Valentine ramp ups, Equinox Gold's development pipeline includes ~200,000 ounces per year from Castle Mountain Phase 2 in California, an underground expansion at Aurizona in Brazil, and the potential restart of operations at Los Filos in Mexico. The Company is also investing in exploration across the portfolio for mine life extension and to identify its next generation of mines.
