Equinox Gold
North America's New Senior Gold Producer

Q2 2026 RESULTS & CORPORATE UPDATE
AUGUST 6, 2026

EQUINOX GOLD

TSX: EQX NYSE-A: EQX

Cautionary Notes

Forward-looking Statements. This presentation contains certain forward-looking information and forward-looking statements within the meaning of applicable securities legislation and may include future-oriented financial information or financial outlook information (collectively "Forward-looking Information"). Actual results of operations and the ensuing financial results may vary materially from the amounts set out in any Forward-looking Information. Forward-looking Information in this presentation includes: benefits of the Company's combination with Orla Mining, including Company's strategic vision and expectations for production capabilities, cash flow, growth and long-term value; the Company's updated 2026 consolidated guidance, including production, cash costs, AISC, growth capital, exploration expenditures and G&A; Valentine Phase 2 expansion, including expected processing capacity, production and the timing of engineering, procurement and construction; the timing of the Federal Record of Decision for South Railroad and Castle Mountain, as well as the associated timing of construction; the restart of operations and expansion opportunities at Los Filos; the advancement of South Railroad, Los Filos, Castle Mountain and Camino Rojo as part of the Company's growth pipeline; statements relating to the distribution of dividends to shareholders of the Company and the Company's share buyback program; and the Company's goals and objectives. Forward-looking Information is typically identified by words such as "believe", "will", "initiate", "continue", "achieve", "grow", "advance", "update", "progress", "expand", "discover", "expect", "estimate", and similar terms, including variations like "may", "could", or "should", or the negative connotation of such terms. While the Company believes these expectations are reasonable, they are not guarantees and undue reliance should not be placed on them. Forward-looking Information is based on the Company's current expectations and assumptions, including: achievement of the expected benefits of the transaction with Orla Mining; achievement of exploration, production, cost and development goals; achieving design capacity at Greenstone and Valentine operations; successful implementation of the Phase 2 expansion at Valentine; the restart of Los Filos; timely receipt of South Railroad and Castle Mountain permitting; stable gold prices and input costs; geopolitical stability; potential future mining opportunities; availability of funding, accuracy of Mineral Reserve and Mineral Resource estimates; adherence to mine plans and schedules; expected ore grades and recoveries; absence of labour disruptions or unplanned delays; productive relationships with workers, unions and communities; maintenance and timely receipt of permits and regulatory approvals; compliance with environmental and safety regulations; and constructive engagement with Indigenous and community partners. While the Company considers these assumptions reasonable, they may prove incorrect. Forward-looking Information involves numerous risks, uncertainties and other factors that may cause actual results and developments to differ materially from those expressed or implied by such Forward-looking Information. Such factors include those described in the section "Risk Factors" in the Company's Management Information Circular dated June 19, 2026, in the section "Risk Factors" in the Company's MD&A for the year ended December 31, 2025, and in the section titled "Risks Related to the Business" in Equinox Gold's most recently filed Annual Information Form, each of which are available on SEDAR+ at www.sedarplus.ca, on EDGAR at www.sec.gov/edgar and on Equinox Gold's website at www.equinoxgold.com. Forward-looking Information reflects management's current expectations for future events and is subject to change. Except as required by applicable law, the Company assumes no obligation to update or to publicly announce the results of any change to any Forward-looking Information contained or incorporated by reference to reflect actual results, future events or developments, changes in assumptions or other factors affecting Forward-looking Information. If the Company updates any Forward-looking Information, no inference should be drawn that the Company will make additional updates with respect to those or other Forward-looking Information. All Forward-looking Information contained in this presentation is expressly qualified by this cautionary statement.

Non-IFRS Measures. This presentation refers to all-in sustaining costs (AISC) per ounce sold, cash costs per ounce sold, adjusted net income, adjusted earnings per share, and EBITDA (earnings before interest, taxes, depreciation and amortization) which are measures with no standardized meaning under International Financial Reporting Standards (IFRS) and may not be comparable to similar measures presented by other companies. Their measurement and presentation are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Non-IFRS measures are widely used in the mining industry as measurements of performance and the Company believes that they provide further transparency into costs associated with producing gold and will assist analysts, investors and other stakeholders of the Company in assessing its operating performance, its ability to generate free cash flow from current operations and its overall value. Refer to the "Non-IFRS measures" section of Equinox Gold's most recently filed Annual Information Form for a more detailed discussion of these non-IFRS measures and their calculation.

Cautionary Note to U.S. Readers Concerning Estimates of Mineral Reserves and Mineral Resources. Disclosure regarding mineral properties included in this presentation, was prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (NI 43-101). NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. NI 43-101 differs significantly from the disclosure requirements of the Securities and Exchange Commission (the SEC) generally applicable to U.S. companies. Accordingly, information contained in this presentation is not comparable to similar information made public by U.S. companies reporting pursuant to SEC disclosure requirements.

Numbers may not sum due to rounding. **All dollar amounts in USD unless otherwise noted.**

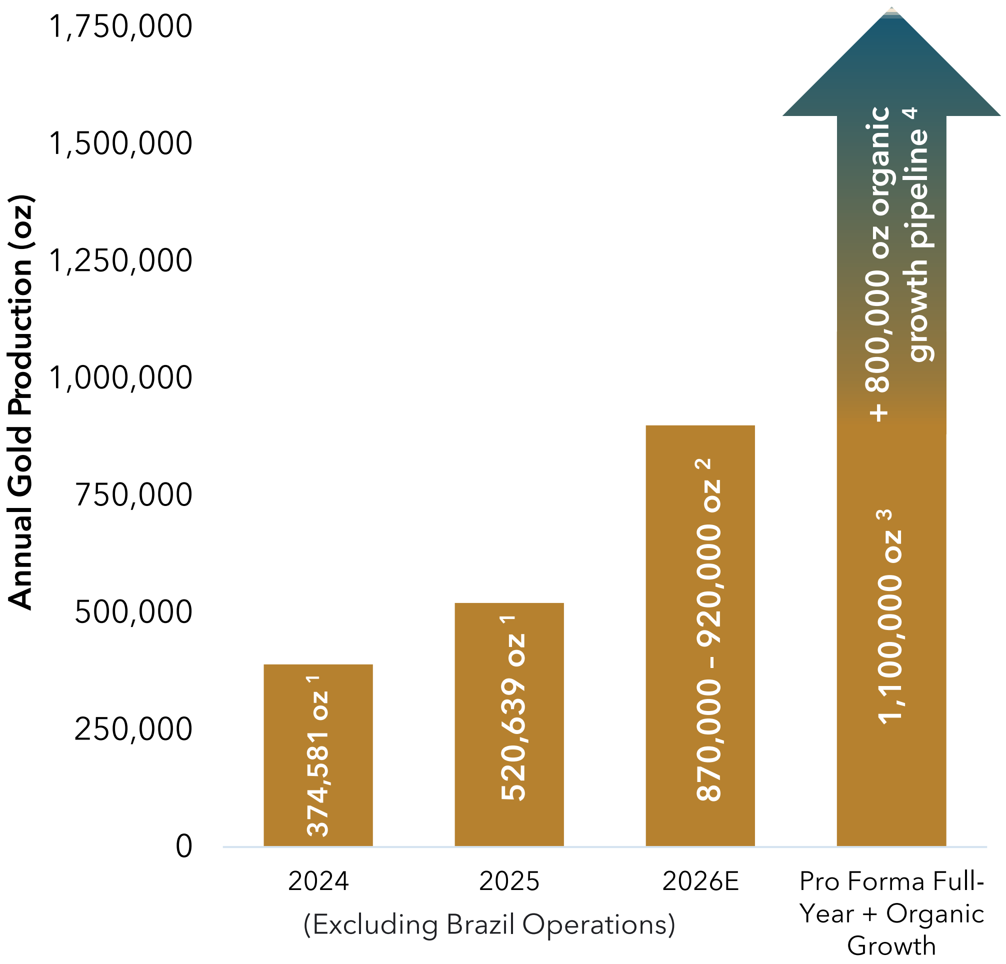
Equinox Gold: A Stronger, Growth-Oriented Senior Gold Producer

Positioned for Value Creation

- ✓ Quality long life, high margin gold assets
- ✓ Second largest producer of Canadian gold
- ✓ Proven track record and continued focus on delivering into commitments
- ✓ Advanced low-risk growth with clear path to more than 1.9 Moz

2026 Value Drivers

- Combined asset base delivering stronger cash flow in H2
- Q3 Record of Decision and construction ramp up at South Railroad (USA)
- Los Filos activities to support restart of heap-leach operations (Mexico)
- Progressing Valentine Phase 2 (Canada)
- Continue with quarterly dividend and share buyback
    - Q2: 50% Dividend increase
- Disciplined capital allocation to maximize returns



See *Cautionary Notes*. 1. 2024 and 2025 production shown exclusive of production from Equinox Gold's Brazil Operations, which were sold on January 23, 2026. 2. Equinox Gold's updated 2026 production guidance reflects five months (August to December 2026) of contribution from Musselwhite and Camino Rojo . 3. Based on twelve-month production of the recently acquired Orla Mining operations. 4. Anticipated production growth comes from completion of the Valentine Phase 2 (Canada) and with Castle Mountain (USA), South Railroad (USA), Los Filos (Mexico) and Camino Rojo underground (Mexico) in production and operating in line with expectations outlined in current technical reports. Technical reports are available under the respective SEDAR+ profiles.

Equinox Gold: 2026 Execution, Increasing Confidence

Q2 2026 Highlights

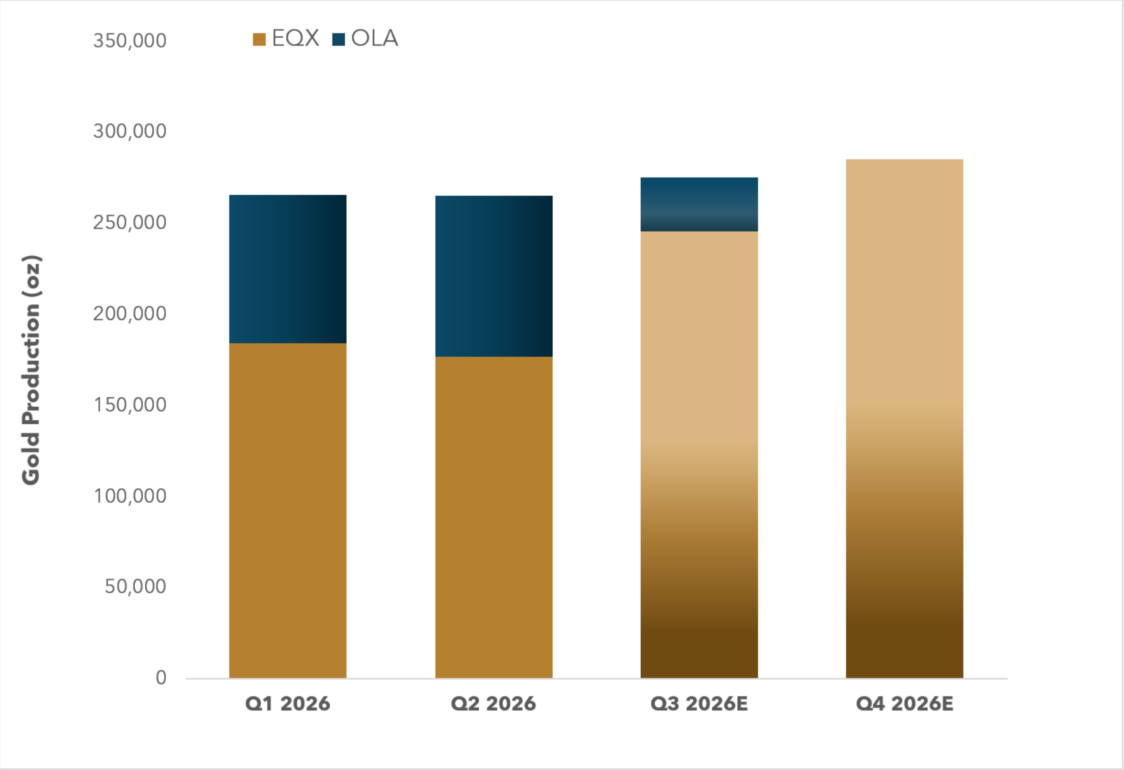
- EQX Consolidated production of 176,836 ounces of gold
  - Greenstone: Mill throughput averaged 26,856 tpd (nameplate 27,000 tpd)
  - Valentine: Mill throughput averaged 7,730 tpd (nameplate 6,850 tpd)
  - Consolidated Q2 total cash costs[1] $1,816/oz ($1,719/oz year-to-date)
  - Consolidated Q2 All-in sustaining costs[1] $2,175/oz ($2,057/oz year-to-date)
- OLA Consolidated production of 88,265 ounces of gold
  - Musselwhite: Q2 production 67,077, continued strong grade performance
- Consolidated year-to-date production for the combined portfolio of 543,935 oz [2]
- Net Cash of $214M at July 31, 2026 [3]
  - Cash $729M, debt $515M, available liquidity $1.2B [4]

Full Year Combined Outlook (full year EQX, 5 months OLA)

- Production: 870,000 – 920,000 ounces (>1.1 Moz full year pro-forma) [5]
- Consolidated total cash costs[2] $1,600 – $1,700/oz
- Consolidated All-in sustaining costs[2] $1,900 – $2,000/oz
- H2 2026: Stronger production and lower All-in sustaining costs per oz

- Valentine Phase 2, Canada: construction to begin H2
- South Railroad, USA: ROD August 2026, construction ramp up Q3
- Castle Mountain, USA: Permits in H1 2027

Improving AISC in H2 2026
Expecting Stronger Cash Flow Generation For The Balance Of The Year



1. Cash costs per oz sold and AISC per oz sold are non-IFRS measures. See Non-IFRS Measures and Cautionary. 2. Consolidated YTD production includes 13,473 oz from Brazil (Discontinued Operations). 3. Calculated using combined Equinox Gold and Orla cash of $729 million, as reported by Equinox Gold and Orla as at June 30, 2026, and drawn debt of $515 million as of July 31, 2026, excluding in-the-money convertible debentures and equipment loans. Pro forma adjustments reflect repayment of the Orla Term Loan and Revolving Credit Facility but exclude estimated transaction costs that will be reflected in Q3 2026. 4. Available liquidity is calculated as combined $729 million of cash as at June 30, 2026 plus $485 million of undrawn debt on Equinox Gold's Revolving Credit Facility as at July 31, 2026. 5.For comparative purposes, on a full-year pro forma basis, assuming the Equinox Gold and Orla Mining business combination had been completed on January 1, 2026.

Updated 2026 Guidance

2026 GUIDANCE*

5 Months (August to December) contributions from Musselwhite and Camino Rojo
+1.1 million ounces of full year production from all assets

	Consolidated	Greenstone (Jan - Dec)	Musselwhite (Aug - Dec)	Valentine (Jan - Dec)	Nicaragua (Jan - Dec)	Camino Rojo (Aug - Dec)	Mesquite (Jan - Dec)	Project Pipeline

2026 Growth Capex: South Railroad: $70-$80M, Valentine Phase 2 Expansion: $50-$60M, Los Filos restart: $35-$40M

* The Company may revise guidance during the year to reflect changes to expected results. See *Cautionary Notes*. 1. Cash costs per ounce sold and AISC per ounce sold are non-IFRS measures. See *Non-IFRS Measures and Cautionary Notes*. Consolidated AISC per oz sold excludes corporate general and administrative expenses. 2. 2026 Growth Capital guidance includes $70-$80M for South Railroad and $35-$40M for Los Filos. Valentine's Growth Capital includes $50-$60M allocated to Phase 2. Phase 2 was previously not included in the 2026 Original Guidance pending Board approval of construction. 3. General and administrative expenses exclude share-based compensation and transaction costs.

Equinox Gold: A Stronger, Growth-Oriented Senior Gold Producer

Positioned for Value Creation

- ✓ Quality long life, high margin gold assets
- ✓ Second largest producer of Canadian gold

Appendix

Strong Growth Pipeline: Clear Path to +1.9 Moz of Production

VALENTINE[1] Newfoundland, Canada 2.7 Moz Reserves	**~48 koz**	• Phase 2 construction anticipated to begin Q3 2026; Expansion to double throughput to ~5.0 Mtpa • Phase 2 construction to be completed in late 2028; average annual production of ~223 koz (2026-2036)
SOUTH RAILROAD[2] Nevada, USA 1.5 Moz Reserves	**~130 koz**	• FAST-41 program project: Federal Record of Decision expected in Q3 2026 • Targeting construction completion in H2 2027
CASTLE MOUNTAIN[3] California, USA 4.1 Moz Reserves	**~220 koz**	• FAST-41 program project: Federal Record of Decision expected in Q4 2026 • Technical report update underway with construction start targeted for H2 2027
LOS FILOS[4] Guerrero, Mexico 5.4 Moz Reserves	**~280 koz**	• Progress Los Filos engineering, exploration and social license • Finalized community agreements and development plans
CAMINO ROJO UG[5] Zacatecas, Mexico 3.8 Moz M&I	**~215 koz**	• Received permits for underground decline in March 2026 – PFS targeted for 2027 • Commencing development of exploration decline in H2 2026

More than 800 koz of organic growth potential in North America

See *Cautionary Notes.* 1. Reserves based on March 2026 technical study; incremental production relative to anticipated Phase 1 steady-state production. 2. Reserves and first 5-year average annual production based on February 2026 technical study for the South Railroad Gold Project. 3. Reserves and production potential based on the 2021 feasibility study. 4. Reserves and production potential with construction of a CIL plant and development of Bermejal underground mine based on 2022 feasibility study. 5. Measured and Indicated ("M&I") resources and first 10-year average annual production based on February 2026 technical study.

Combining Three Canadian Cornerstone Assets

Greenstone

~320,000 oz gold
AVG. ANNUAL PRODUCTION (2026-2036)[1]

14+ year
INITIAL MINE LIFE

~5.3 Moz
P&P RESERVES[2]

RAMPING UP
2026 GUIDANCE: 250,000-275,000 oz

Musselwhite

~235,000 oz gold
ANNUAL PRODUCTION[3]

~28 years
IN PRODUCTION

~1.5 Moz
P&P RESERVES[4]

GROWTH POTENTIAL
ADDITIONAL MILL CAPACITY, NEAR-MINE DEPOSITS, EXTENSION OF UNDERGROUND DEPOSIT ALONG TREND

Valentine

~223,000 oz gold
AVG. ANNUAL PRODUCTION (2026-2036)[5]

11+ year
INITIAL MINE LIFE

~2.7 Moz
P&P RESERVES[2]

RAMPING UP
2026 GUIDANCE: 140,000-150,000 oz
PHASE 2 EXPANSION APPROVED

1. Average annual production from 2026-2036 based on the 2026 technical report. See *Equinox: Technical Disclosure* and *Cautionary Notes*.
2. As per the 2026 technical reports. See *Equinox: Technical Disclosure* and *Cautionary Notes*.
3. Based on midpoint of Orla's original full-year 2026 guidance.
4. As of December 31, 2025. See *Orla: Technical Disclosure*.
5. Assuming successful completion of the Phase 2 expansion, as outlined in the 2026 technical report.

Technical Disclosure

National Instrument 43-101

Scientific and technical information concerning the Greenstone Gold Mine is summarized, derived, or extracted from the "NI 43-101 Technical Report, Greenstone Property, Ontario" dated March 30, 2026 with an effective date of December 31, 2025. Scientific and technical information concerning the Valentine Mine is summarized, derived, or extracted from the "NI 43-101 Technical Report, Valentine Gold Mine, Newfoundland and Labrador, Canada" dated March 30, 2026 with an effective date of December 31, 2025. Scientific and technical information concerning the Mesquite Mine is summarized, derived, or extracted from the "Technical Report on the Mesquite Gold Mine, Imperial County, California, U.S.A." April 27, 2020 with an effective date of December 31, 2019. Mesquite Mineral Reserve and Mineral Resources were updated at December 31, 2025, with the results announced in a news release dated March 30, 2026. Scientific and technical information concerning the Castle Mountain Mine is summarized, derived, or extracted from the "Technical Report on the Castle Mountain Project Feasibility Study" dated March 17, 2021 with an effective date of February 26, 2021. Scientific and technical information concerning the Los Filos Mine Complex is summarized, derived, or extracted from the "Updated Technical Report for the Los Filos Mine Complex, Mexico" dated June 30, 2022 with an effective date of October 19, 2022. Each of these Technical Reports has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold's website at www.equinoxgold.com, on Equinox Gold's profile on SEDAR+ at www.sedarplus.ca and on Equinox Gold's profile on EDGAR at www.sec.gov/edgar.

Scientific and technical information concerning the Musselwhite Mine is summarized, derived, or extracted from the "Technical Report – Musselwhite Mine Project, Ontario, Canada" dated with an effective date of November 18, 2024. Scientific and technical information concerning the South Railroad Project is summarized, derived, or extracted from the "South Railroad Project NI 43-101 Feasibility Study Update, Elko County, Nevada" dated February 27, 2026 with an effective date of September 30, 2025. Scientific and technical information concerning the Camino Rojo Mine is summarized, derived, or extracted from the "NI 43-101 Technical Report Camino Rojo Project, Zacatecas State, Mexico" dated March 18, 2026 with an effective date of September 30, 2025. Each of these Technical Reports has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold's website at www.equinoxgold.com, on Orla Mining's profile on SEDAR+ at www.sedarplus.ca and on Orla Mining's profile on EDGAR at www.sec.gov/edgar.

Scientific and technical information concerning the La Libertad Complex is summarized, derived, or extracted from the "Technical Report on La Libertad Complex, Nicaragua, Report for NI 43-101" dated March 29, 2022 with an effective date of December 31, 2021. Scientific and technical information concerning the El Limon Mine is summarized, derived, or extracted from the "Technical Report on El Limon Complex, Leon and Chinandego Departments, Nicaragua, Report for NI 43-101" dated March 30, 2021 with an effective date of December 31, 2020. Each of these Technical Reports has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold's website at www.equinoxgold.com and on Calibre Mining's profile on SEDAR+ at www.sedarplus.ca. Mineral Reserves and Mineral Resources for El Limon and La Libertad were updated at December 31, 2025, with the results announced in a news release dated March 30, 2026.

Readers are reminded that results outlined in the technical reports for some of these projects are preliminary in nature and may include Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. There is no certainty that the mine plans and economic models contained in any of the reports will be realized. Readers are further cautioned that Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Readers are also advised to refer to the latest annual information form and technical reports of the Companies as well as other continuous disclosure documents filed by the Companies, which are available on SEDAR+, for detailed information (including qualifications, assumptions and notes set out accordingly) regarding the Mineral Reserve and Mineral Resource information contained in this document.

Technical Information

The scientific and technical information contained in this presentation related to the Greenstone, Castle Mountain, Mesquite, Los Filos, Kailey, Key Lake, Hasaga and Brookbank properties was reviewed by Philippe LeBleu, P.Eng., VP Mining Engineering and a "Qualified Person" under National Instrument 43-101. The scientific and technical information related to the Valentine, El Limon, La Libertad and Golden Eagle properties was reviewed by David Schonfeldt, P.Geo., VP Mine Geology and a "Qualified Person" under National Instrument 43-101. The scientific and technical information contained in this presentation related to the Musselwhite, Camino Rojo and South Railroad properties was reviewed by Andrew Cormier, Chief Operating Officer and a "Qualified Person" under National Instrument 43-101.
